Heteromation, and Other Stories of Computing and Capitalism Hamid R. Ekbia, Bonnie A. Nardi, 2017-05-04 An exploration of a new division of labor between machines and humans in which people provide value to the economy with little or no compensation The computerization of the economy and everyday life has transformed the division of labor between humans and machines shifting many people into work that is hidden poorly compensated or accepted as part of being a user of digital technology Through our clicks and swipes logins and profiles emails and posts we are more or less willingly participating in digital activities that yield economic value to others but little or no return to us Hamid Ekbia and Bonnie Nardi call this kind of participation the extraction of economic value from low cost or free labor in computer mediated networks heteromation In this book they explore the social and technological processes through which economic value is extracted from digitally mediated work the nature of the value created and what prompts people to participate in the process Arguing that heteromation is a new logic of capital accumulation Ekbia and Nardi consider different kinds of heteromated labor communicative labor seen in user generated content on social media cognitive labor including microwork and self service creative labor from gaming environments to literary productions emotional labor often hidden within paid jobs and organizing labor made up of collaborative groups such as citizen scientists Ekbia and Nardi then offer a utopian vision heteromation refigured to bring end users more fully into the prosperity of capitalism

International Climate Change Law Daniel Bodansky, Jutta Brunnée, Lavanya Rajamani, 2017-06-08 This textbook by three experts in the field provides a comprehensive overview of international climate change law Climate change is one of the fundamental challenges facing the world today and is the cause of significant international concern In response states have created an international climate regime The treaties that comprise the regime the 1992 United Nations Framework Convention on Climate Change the 1997 Kyoto Protocol and the 2015 Paris Agreement establish a system of

governance to address climate change and its impacts This book provides a clear analytical guide to the climate regime as well as other relevant international legal rules The book begins by locating international climate change law within the broader context of international law and international environmental law It considers the evolution of the international climate change regime and the process of law making that has led to it It examines the key provisions of the Framework Convention the Kyoto Protocol and the Paris Agreement It analyses the principles and obligations that underpin the climate regime as well as the elaborate institutional and governance architecture that has been created at successive international conferences to develop commitments and promote transparency and compliance The final two chapters address the polycentric nature of international climate change law as well as the intersections of international climate change law with other areas of international regulation This book is an essential introduction to international climate change law for students scholars and negotiators
