Recipes for Respect Rafia Zafar, 2019-03-15 Food studies once trendy has settled into the public arena. In the academy, scholarship on food and literary culture constitutes a growing river within literary and cultural studies, but writing on African American food and dining remains a tributary. *Recipes for Respect* bridges this gap, illuminating the role of foodways in African American culture as well as the contributions of Black cooks and chefs to what has been considered the mainstream. Beginning in the early nineteenth century and continuing nearly to the present day, African Americans have often been stereotyped as illiterate kitchen geniuses. Rafia Zafar addresses this error, highlighting the long history of accomplished African Americans within our culinary traditions as well as the literary and entrepreneurial strategies for civil rights and respectability woven into the written records of dining, cooking, and serving. Whether revealed in cookbooks or fiction, memoirs or hotel-keeping manuals, agricultural extension bulletins or library collections, foodways knowledge sustained Black strategies for self-reliance and dignity, the preservation of historical memory, and civil rights and social mobility. If to follow Mary Douglas's dictum, food is a field of action that is a venue for social intimacy, exchange, or aggression, African American writing about foodways constitutes an underappreciated critique of the racialized social and intellectual spaces of the United States.

Lone Actor Terrorists Paul Gill, 2015-02-11 This book provides the first empirical analysis of lone actor terrorist behaviour. Based upon a unique dataset of 111 lone actors, it catalogues the life span of the individual's development. The book contains important insights into what an analysis of their behaviours might imply for practical interventions aimed at disrupting or even preventing attacks. It adopts insights and methodologies from criminology and forensic psychology to provide a holistic analysis of the behavioural underpinnings of lone actor terrorism. By focusing upon the behavioural aspects of each offender and by analysing a variety of case studies, including Anders Breivik, Ted Kaczynski, Timothy McVeigh, and David Copeland, this work marks a pointed departure from previous research in the field. It seeks to answer the following key questions: Is there a lone actor terrorist profile and how do they differ? What behaviours did the lone actor terrorist engage in prior to his/her attack, and is there a common behavioural trajectory into lone actor terrorism? How lone do lone actor terrorists tend to be? What role, if any, does the internet play? What role, if any, does mental illness play? This book will be of much interest to students of terrorism, counterterrorism studies, political violence, criminology, forensic psychology, and security studies in general.

The Natural Gas Industry in Appalachia David A. Waples, 2012-05-10 The large-scale practical uses of natural gas were initially introduced by innovators Joseph Pew and George Westinghouse for the steel and glass industries in Pittsburgh, and local gas companies evolved from individual wells to an interstate supply network acquired by Rockefeller's Standard Oil interests. Natural gas is now a prevalent part of American markets, and with the production from the Marcellus shale is filling the critical void left by a lack of new coal, oil, and nuclear power facilities. This vital American enterprise began in the Appalachian states as an accidental and underestimated byproduct of the oil rush of 1859. This book explores the evolution and significance of the natural gas industry to the present day.
