Sailing to the Edge of Time John Kretschmer, 2018-11-13 John Kretschmer is sailing s practical philosopher as much a doer as a thinker And that is the overarching theme of this chronicle of a sailing life Often amusing sometimes poignant occasionally terrifying but always inspiring his deeply personal account is a welcome reminder of the good life waiting at sea With hundreds of thousands of nautical miles under his keel John s adventures have taken him

several times around the world with challenging crossings of the Atlantic and the Pacific a narrow escape from a coup in Yemen an unlikely deliverance from a coral reef off Belize as well as more serene introspective passages where trade winds are blowing and stories are flowing His crew has included CEOs actors writers teachers kids in essence everyone John s narrative is interwoven with practical tips and advice in seamanship but also and just as importantly his hard won insights about making the most of our lives He truly believes we find out who we really are and what we are capable of far from the shackles of land when we find a place where time changes shape days may merge into one another but minutes are memorable To live adventurously is to live more fully and that is the life John Kretschmer continues to live In this book he shares his simple profundities that will inspire those who live to sail and those seeking something more rewarding from life

importance of freight transport for global trade and economic development. Additionally, decision makers lack a comprehensive view on how shipping flows can be measured, analyzed and mapped in order to support their policies and strategies. This interdisciplinary volume, drawing on an international cast list of experts, explores a number of crucial issues in shipping data estimation, construction, collection, mining, analysis, visualization and mapping. *Advances in Shipping Data Analysis and Modeling* delivers several key messages. First, that in a world of just in time delivery and rapid freight transit it is important to bear in mind the long term roots of current trends as well as foreseeable future developments because shipping patterns exhibit recurrent if not cyclical and path dependent dynamics. Second, shipping flows are currently often understood at the micro level of intra urban logistics delivery and at the national level using commodity flow analyses but this volume emphasizes the need to expand the scale of analysis by offering new evidence on the changing distribution of global and international shipping flows based on actual data. Third, that this multidisciplinary approach to shipping flows can shed important light on crucial issues that go beyond shipping itself including climate change, urban development, technological change, commodity specialization, digital humanities, navigation patterns, international trade and regional growth. Edited by experts in their field, this volume is of utmost importance to those who study industrial economics, shipping industries and economic and transport geography.

The Protection of the Underwater Cultural Heritage Sarah Dromgoole, 2006-09-01. The legal protection of the underwater cultural heritage is a field in which there is growing international interest. Shipwrecks and other underwater cultural remains in every maritime zone are threatened both by activities directed at them such as treasure hunting and by activities incidentally affecting them such as mineral exploration and exploitation, pipeline and cable laying, dredging and fishing. Since the first edition of this collection published in 1999, the urgent need for an international legal framework to regulate these activities has been formally recognised by the adoption in 2001 of the UNESCO Convention on the Protection of the Underwater Cultural Heritage. While the prospects for this Convention remain uncertain, it will undoubtedly have a profound influence on national laws and practice in this field. This second collection of essays examines the present state of law, policy and practice in sixteen different jurisdictions around the world in light of the 2001 Convention. Among other things, the viewpoint of each jurisdiction in respect of the Convention is considered and the impact that the Convention is already having and is likely to have in the future is explored. Eight of the essays are entirely new and several additional jurisdictions are covered: Finland, the Federated States of Micronesia, the Netherlands, New Zealand and Norway. The other essays have been thoroughly updated and revised to take account of the Convention. The contributors come from a variety of backgrounds but all have specialist knowledge and experience of their particular jurisdiction and a keen interest in the field.
