Document Processing and Retrieval Qianhong Liu, Peter A. Ng, 2012-12-06 Document Processing and Retrieval TEXPROS focuses on the design and implementation of a personal customizable office information and document processing system called TEXPROS a TEXT PROcessing System TEXPROS is a personal intelligent office information and document processing system for text oriented documents This system supports the storage classification categorization retrieval and reproduction of documents as well as extracting browsing retrieving and synthesizing information from a variety of documents When using TEXPROS in a multi user or distributed environment it requires specific protocols for extracting storing transmitting and exchanging information The authors have used a variety of techniques to implement TEXPROS such as Object Oriented Programming Tcl Tk X Windows etc The system can be used for many different purposes in many different applications such as digital libraries software documentation and information delivery Audience Provides in depth state of the art coverage of information processing and retrieval and documentation for such professionals as database specialists information systems and software developers and information providers *Rapid Environmental Assessment (REA) investigator handbook* Food and Agriculture Organization of the United Nations, 2020-01-10 The handbook is intended to complement training provided by FAO and will help to guide trained investigators through the process of successfully completing a Rapid Environmental Assessment REA of locations thought to be contaminated with pesticides It is not intended to be a substitute for attending a training event and as a standalone document is insufficient to fully introduce the REA protocol **Training Opportunities** United States. Department of State. Bureau of Diplomatic Security. Training Center, 1990 **Monte Carlo and Quasi-Monte Carlo Sampling** Christiane Lemieux, 2009-04-03 Quasi Monte Carlo methods have become an increasingly popular alternative to Monte Carlo methods over the last two decades Their successful implementation on practical problems especially in finance has motivated the development of several new research areas within this field to which practitioners and researchers from various disciplines currently contribute This book presents essential tools for using quasi Monte Carlo sampling in practice The first part of the book focuses on issues related to Monte Carlo methods uniform and non uniform random number generation variance reduction techniques but the material is presented to prepare the readers for the next step which is to replace the random sampling inherent to Monte Carlo by quasi random sampling The second part of the book deals with this next step Several aspects of quasi Monte Carlo methods are covered including constructions randomizations the use of ANOVA decompositions and the concept of effective dimension The third part of the book is devoted to applications in finance and more advanced statistical tools like Markov chain Monte Carlo and sequential Monte Carlo with a discussion of their quasi Monte Carlo counterpart The prerequisites for reading this book are a basic knowledge of statistics and enough mathematical maturity to follow through the various techniques used throughout the book This text is aimed at graduate students in statistics management science operations research engineering and applied mathematics It should also be useful
