

The 5 phases of the project life cycle

01

Initiation

Initiation is the project kick-off phase. This is when you collect all the information needed from key stakeholders. This phase defines the problem and details what needs to be done.

02

Planning

The planning phase is the foundation for the project. This is when you detail all the work, how you plan on doing it, and what resources you'll need to meet project goals.

03

Execution

The execution phase is when you get stuff done. This is where you put everything you planned into motion and complete deliverables to achieve the project objectives.

04

Monitoring

The monitoring phase goes hand-in-hand with the execution phase. It's about monitoring the project's overall progress to see if you're meeting project objectives and are on track.

05

Closure

The closure phase wraps things up. You'll hand over documentation, release final deliverables, terminate contracts, and inform everyone that the project is complete.
