Taube, 2011-10-12 Facilitates discussion about project based organizations PBOs and how they increasingly pervade business dimensions from R D and new product development to the production of complex capital goods and implementation of organizational change across very different industries such as management consulting engineering or entertainment

Measuring Economic Growth and Productivity Barbara Fraumeni, 2019-11-06 Measuring Economic Growth and Productivity Foundations KLEMS Production Models and Extensions presents new insights into the causes mechanisms and results of growth in national and regional accounts It demonstrates the versatility and usefulness of the KLEMS databases which generate internationally comparable industry level data on outputs inputs and productivity By rethinking economic development beyond existing measurements the book s contributors align the measurement of growth and productivity to contemporary global challenges addressing the need for measurements as well as the Gross Domestic Product All contributors in this foundational volume are recognized experts in their fields all inspired by the path breaking research of Dale W Jorgenson

Financial Crisis, Austerity, and Electoral Politics Pedro Magalhães, 2017-10-02 This book examines the domestic electoral consequences of the economic and financial crisis in Europe particularly in those countries where the crisis manifested itself more devastatingly the Southern European countries of Greece Italy Portugal and Spain as well as Iceland and Ireland On the surface the electoral consequences of the crisis seem largely similar having resulted in these countries in large electoral losses for incumbents as the most elementary versions of economic voting theory would have us

expect However behind this fundamental similarity important differences emerge Whilst in some cases on the basis of post election surveys it is possible to see that the crisis elections followed a previous pattern of performance oriented voters with no major changes either in known predictors of electoral choices or in basic party system properties other elections brought the emergence of new parties new issues and cleavages altering patterns of political competition By examining these different outcomes by comparing the crisis elections with previous ones this book takes into account their timing relative to different stages of crisis It also scrutinises party strategies and campaign dynamics particularly as governments attempted and sometimes succeeded in framing events and proposals so as to apportion responsibility for economic outcomes This book was originally published as a special issue of the Journal of Elections Public Opinion and Parties

Contemporary Issues in Behavioral Finance Simon Grima,Ercan Özen,Hakan Boz,Jonathan Spiteri,Eleftherios I. Thalassinou,2019-07-04 This special edition of Contemporary Studies in Economic and Financial Analysis offers seventeen chapters from invited participants in the International Applied Social Science Congress held in Turkey between the 19th and 21st April 2018

Social Mobility in Developing Countries Vegard Iversen,Anirudh Krishna,Kunal Sen,2021-12-17 Social mobility is the hope of economic development and the mantra of a good society There are disagreements about what constitutes social mobility but there is broad agreement that people should have roughly equal chances of success regardless of their economic status at birth Concerns about rising inequality have engendered a renewed interest in social mobility especially in the developing world However efforts to construct the databases and meet the standards required for conventional analyses of social mobility are at a preliminary stage and need to be complemented by innovative conceptual and methodological advances If forms of mobility have slowed in the West then we might be entering an age of rigid stratification with defined boundaries between the always haves and the never haves which does not augur well for social stability Social mobility research is ongoing with substantive findings in different disciplines typically with researchers in isolation from each other A key contribution of this book is the pulling together of the emerging streams of knowledge Generating policy relevant knowledge is a principal concern Three basic questions frame the study of diverse aspects of social mobility in the book How to assess the extent of social mobility in a given development context when the datasets by conventional measurement techniques are unavailable How to identify drivers and inhibitors of social mobility in particular developing country contexts How to acquire the knowledge required to design interventions to raise social mobility either by increasing upward mobility or by lowering downward mobility

The Hindu Kush Himalaya Assessment Philippus Wester,Arabinda Mishra,Aditi Mukherji,Arun Bhakta Shrestha,2019-01-04 This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya HKH region It comprises important scientific research on the social economic and environmental pillars of sustainable mountain development and will serve as a basis for evidence based decision making to safeguard the environment and advance people s well being The compiled content is based on the collective knowledge of over 300 leading

researchers experts and policymakers brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme HIMAP under the coordination of the International Centre for Integrated Mountain Development ICIMOD This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports under the guidance of the HIMAP Steering Committee Eklabya Sharma ICIMOD Atiq Raman Bangladesh Yuba Raj Khatriwada Nepal Linxiu Zhang China Surendra Pratap Singh India Tandong Yao China and David Molden ICIMOD and Chair of the HIMAP SC This First HKH Assessment Report consists of 16 chapters which comprehensively assess the current state of knowledge of the HKH region increase the understanding of various drivers of change and their impacts address critical data gaps and develop a set of evidence based and actionable policy solutions and recommendations These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals This book is a must read for policy makers academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports

Public-Private Partnerships in Transitional Nations

Nada Kakabadse, Nikolai Mouraviev, 2017-06-23 This collection examines public private partnerships PPPs in transitional nations from the governance perspective It explores the structures legal frameworks and collaborative arrangements that underpin partnerships in Europe Asia and Africa and highlights government decisions that facilitate the transformation of societal challenges into developmental opportunities By sharing the experience of nine nations including China Indonesia Russia and Nigeria it helps to better understand the commonalities in PPP deployment avoid mistakes and pitfalls and learn from other economies The book raises the critical questions that concern many governments including What are the common and frequent mistakes that governments make when they deploy partnerships and deal with governance issues How can countries increase PPPs benefits Can PPPs be instrumental in accomplishing certain less traditional government tasks such as disaster risk management of built infrastructure and promotion of clean energy Can PPPs serve as a backbone of entrepreneurial networks and contribute to sustainable development The groundwork is laid out for contrasting and comparing successful and unsuccessful government actions institutional legal and financing initiatives and procedures allowing one to make cross country and cross sectoral comparisons Policy makers consultants managers and others working in the PPP field will find this volume useful as well as academics as they can learn from the international comparisons and the experience of others

Governance in the Developing World Mohamed Sami Ben Ali, Sami Ben Mim, 2023-06-19 This book assesses the extent to which good governance may contribute to enhancing economic performance and social welfare in developing countries globally Governance has been pointed out as one of the major weaknesses of developing economies and may largely be attributed to weak governance practices at both the macro and micro level This book highlights the channels through which governance may act on various economic sectors and different key economic variables In doing so it enables policymakers to identify and implement policies and procedures to promote good governance This book provides a

transnational perspective on good governance in considering developing countries in Asia Africa and beyond presenting respective case studies in single country settings enabling a comparative perspective between and across all chapters Covering topics that include the intersection between governance and gender inequality poverty education and health the book provides diverse theoretical and empirical evidence on important issues facing policymakers investors and other stakeholders and is relevant to graduate students and researchers interest in policy issues in the developing world

Central Bank Policy Perry Warjiyo, Solikin M. Juhro, 2019-07-25 Central Bank Policy Theory and Practice analyses various policies theories and practices adopted by central banks as well as the institutional arrangements underlying the principles of good governance in policy making It is the first book to comprehensively discuss the latest theories and practices of central bank policy

Energy, Bio Fuels and Development Edmund Amann, Werner Baer, Don Coes, 2011-03-07 This collection examines the important and topical issue of the economic social and environmental implications of concerted attempts to diversify energy sources away from fossil fuels The book expertly examines this issue by focussing on the contrasting experiences of two major economies one developed and the other a rapidly expanding emerging market Energy Bio Fuels and Development evaluates the experience of Brazil with elements of that of the US highlighted for the purpose of comparison A key area of concern surrounds the causes and consequences of the contrasting routes to biofuel production represented by sugar cane in Brazil and corn in the US The book also places the recent biofuels drive in perspective by discussing the broader energy policy context The book shows the complexity and interdependence of the issues involved in moving a society reliant on non renewable energy sources to one based on alternative sources of energy The key conclusion to emerge is that Brazil in pursuing a flexible mix of fossil fuels and bio fuels has greatly diminished its exposure to exogenous energy shocks The US experience in particular its development of corn based ethanol has been more problematic though by no means without successes It is argued that bio fuels should not be seen as a panacea There are clear limits to the efficiency and cost effectiveness of current biofuel production technologies while there remain concerns surrounding potentially adverse effects on food production and rural livelihoods This book should be an excellent resource for students focussing on economic development particularly in the areas of energy biofuels rural development and food supply

Water Resources Management in the People's Republic of China Xuetao Sun, Robert Speed, Dajun Shen, 2013-09-13 Chinese water resource managers face a challenge that is both immense and unique They must balance limited water supplies against the needs of the world s largest population demands for rapid economic growth with calls for improved environmental management and the desire for a market based approach to the allocation of water with a history of State ownership and strict government control of all resources In China changes are occurring in water resources management that are representative of many of the fundamental changes occurring within Chinese society on issues such as property rights community participation improved environmental management and the shift towards market based decision making This

book describes the development of a water rights system in the People's Republic of China. It covers different aspects of water resources management in China including water planning, the provision of environmental flows, urban water management and irrigation district management and examines how these are being addressed through a rights-based approach. The book includes several detailed examples of the Chinese application of water rights as they address the diverse challenges of different basins across China. This book previously appeared as a special issue of the International Journal of Water Resources Development.
