*Physical Geography* Stephen J. Stadler, Tom Lee McKnight, Darrel Hess, 2007

*The College Instructor's Guide to Writing Test Items* Michael Rodriguez, Anthony Albano, 2017-05-25

The College Instructor's Guide to Writing Test Items Measuring Student Learning addresses the need for direct and clear guidance on item writing for assessing broad ranges of content in many fields

By focusing on multiple choice response items

this book provides college instructors the tools to understand develop and use assessment activities in classrooms in a way that consistently supports learning Including dozens of example items and additional resources to support the item development process this volume is unique in its practical focus and is essential reading for instructors and soon to be educators professional development specialists and higher education researchers As teaching assessment and learning are inherently intertwined The College Instructor s Guide to Writing Test Items both facilitates the development of instructors own practice and improves the learning outcomes and success of students

**Educational Technology: Current Trends & Innovative Practices** Dr. Sudhir Sudam Kaware,2024-02-23 Information and communication technology ICT opened new paradigm of education in which entire teaching learning process occurs with the help of electronic devices and supportive soft wares ICT provides a new form of learning named E learning is gradually being accepted in the field of education E learning can be defined as the process in which learner learn with the help of electronic gadgets connected with internet facility The main purpose of E learning is to provide the alternative opportunity to learn and makes learning environment learner friendly It makes learning process much open and learner friendly in which students can feel more comfortable in the sense of time speed place and other socio economic factors This study was conducted to know the present status of readiness towards E learning of secondary student teachers in the context of their gender academic level and area of residence

Assessment in Geographical Education: An International Perspective Theresa Bourke,Reece Mills,Rod Lane,2022-02-27 In recent years there has been increased attention paid to the importance of assessment in Geographical Education the chosen subject for this book Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students teachers parents and policymakers To be effective assessment needs to be valid reliable and fair Validity is about ensuring that we assess what we claim we are assessing Reliability is about measuring performance and understanding in a consistent way Without validity and reliability assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning While there is a substantial literature on evidence based assessment in secondary school contexts research exploring best practice assessment in geography is rare This is a concern given the distinctive nature of geography and the important role of assessment in the learning process This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography The chapters are written by leading researchers in Geographical Education from across the globe These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia USA South Korea Germany Switzerland and Singapore What unifies the work in this book is that each chapter focuses on a key

feature of the discipline of geography providing scholarly examples of evidence based practices for assessing student s knowledge and skills

Success and Failure in Israeli Elementary Education Abram Minkowich,Dan Deyá<sup>1</sup>zis,Joseph Bashi, This book presents a comprehensive evaluation study of elementary education in Israel conducted over several years and completed in 1977 The study concentrates on Jewish schools but some data are presented from parallel studies in the Arab Schools A notable feature of the study is its unusually large scope both in size and content It sampled nearly ten percent of Jewish schools and fifteen percent of Arab schools The content includes a great variety of areas cultural origins home conditions and socialization patterns of pupils conditions and practices in schools teachers and principals backgrounds and their attitudes toward central issues in education pupils personality characteristics and motivations related to school experience their learning abilities and achievements in five major school subjects Special emphasis is given to the disadvantaged pupils and an examination of the problem of equality of educational opportunity This study s uniqueness lies in a novel approach in the measurement and analysis of scholastic achievements Like all studies in the psychometric tradition it places pupils in a position related to an advantaged pupil group But test construction and most data analyses were carried out by the criterion reference approach combined with a notion of master learning This enabled presentation of the absolute achievement level of a pupil or a pupil group vis a vis the optimal and minimal requirements of the curriculum and each school subject as well as for its various content area This approach permits much more than the traditional methods utilization of results for deliberation and revision in educational policies This applies particularly to curriculum construction and methods of instruction It may also lead to a more appropriate definition of the disadvantaged pupil Five chapters of the study present a historical review and sociological analysis of the problems of Israeli education and deal with specific methodological considerations The twelve following chapters present detailed results and analysis for each topic of investigation
