Catastrophe Mignon Duffy, Amy Armenia, Kim Price-Glynn, 2023-05-12 The COVID pandemic has shaken the material and social foundations of the world more than any event in recent history and has highlighted and exacerbated a longstanding crisis of care. While these challenges may be freshly visible to the public they are not new. Over the last three decades a growing body of care scholarship has documented the inadequacy of the social organization of care around the world and the effect of the devaluation of care on workers, families and communities. In this volume a diverse group of care scholars bring their expertise to bear on this recent crisis. In doing so they consider the ways in which the existing social organization of care in different countries around the globe amplified or mitigated the impact of COVID. They also explore the global pandemic's impact on the conditions of care and its role in exacerbating deeply rooted gender, race, migration, disability and other forms of inequality.

Learning to Improve Anthony S. Bryk, Louis M. Gomez, Alicia Grunow, Paul G. LeMahieu, 2015-03-01

As a field, education has largely failed to learn from experience. Time after time promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In *Learning to Improve* the authors argue for a new approach. Rather than implementing fast and learning slow, they believe educators should adopt a more rigorous approach to improvement that allows the field to learn fast to implement well. Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt and successfully scale up promising interventions in education. Organized around six core principles, the book shows how networked improvement communities can bring together researchers and practitioners to accelerate learning in key areas of education. Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. *Learning to Improve* offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation's schools and colleges.

Linking Perception and Cognition Michela C. Tacca, 2013 Perception and cognition are tightly related. As our primary mode of contact with the world, perception is the informational and causal foundation of our cognitive processes; it is fundamental to our empirical thinking, believing and action planning. Traditional accounts of the mind consider perception and cognition to be distinct yet highly interrelated systems. Much interdisciplinary empirical and theoretical work from cognitive scientists and philosophers has attempted to elucidate the complex relations holding among these systems, suggesting the existence not only of influences of perception on cognition but also vice versa. However, many questions are left unanswered. Given that perception is a guide to our thinking about and acting upon the world appropriately, the two systems must be able to talk to one another: information carried by perception must be of a form adequate to be taken in by our various cognitive systems. The question arises: What kinds of structural similarities must hold between perceptual and cognitive representations for such communication to be possible? And how exactly do perceptual and cognitive representations interact? Some researchers have argued that the links between perception and cognition are so tight as to

instill doubt as to the significance of the distinction between the two systems in the first place Yet others insist that perception and cognition remain distinct The aim of this Research Topic is to deepen our understanding of the kinds of interaction among perception and cognition and of the nature of the representational structures that would enable such interaction Provided by publisher *Physical Science* ,1981 Physical Science Paper 1 & 2 (June Papers) ,1975
