The term research is well-known to the logical world which plays an important role in finding the new problems and solutions, ideas, techniques, procedures, drugs, etc. Good use of research knowledge especially in writing is imperative to make it beneficial for larger community. In writing of knowledge, proper review of literature is very essential to gather research-problem-related information. Writer should follow the steps throughout collection of data during writing of review article. Review of literature increases clarity, reliability, uniformity and critical evaluation of evidence. This paper attempts to explain the guidelines and steps of review manuscript writing.

Keywords: Guidelines, Review, Characteristics

Introduction

Literature review is the most important aspect of research.¹ A review article is a critical analysis of the literature in a specific area of knowledge through outline, classification, comparison, etc.² A good review article requires briefing, analysing, and synthesizing the study that has been completed on a particular topic. It makes the data more accessible and convenient to publication of research.³ The foremost aim of a review paper is to examine the current status of the given topic as well as talk about the research methodologies and research-problem-related findings. A review text should enclose a complete list of references that are cited in the text.⁴ During writing of review paper, researcher should keep in mind about readers' approaches (i.e., professionals in specific research field, students or beginner research scholars, etc.).^{1,2}

Purpose of a review article

With the help of review article, researcher has to organize,

synthesize and evaluate the literature; in addition, to discover patterns and development in the literature and evaluate the research gaps and propose new research areas.²

Types of Review Article

Review (Overview) Article

There are two basic types of review articles: one is systematic, another is non-systematic. An advanced preparation of specific methodology of review paper is needed in systematic review. Non-systematic review may require a selection of a wide variety of topic-related technical outcome which reflects the expert experiences and interests of the writer.⁴

Critical Review

It analyses the potency as well as fault of a research article after studying the discussed research problem and scientific contents. The review should appropriately explain the

Research Perspectives on White-Collar and Corporate Crime Convenience Petter Gottschalk, 2025-01-06 This study identify current research perspectives on white collar and corporate crime convenience an important emergent area of research It applies the theory of convenience to research articles on white collar and corporate crime recently published in the most relevant journals addressing economic crime This kind of white collar corporate crime is often committed by persons of respectability and high social status who commit financial crime based on their trusted professional positions with high social status While convenience theory covers fourteen convenience propositions there is varying attention to them in the reviewed articles For example a frequent topic analysed in the journal articles is online romance fraud where victims were not on guard because they trusted their offenders Trust tends to strengthen the convenience proposition addressing lack of guardianship oversight and control The book adds substance to the theory of convenience that emerged less than a decade ago and has since been developing and applied by various scholars The review is also interesting from the perspective of understanding what aspects of crime convenience are implicitly and explicitly addressed in economic criminology research that is whether motives opportunities or attitudes are mainly addressed in financial crime research so far The second part of the book presents several short case studies on topics including fraud tax evasion and money laundering The final part of the book discusses gender convenience perspectives and the emerging issues around digital fraud

Biodiesel Fuels Based on Edible and Nonedible Feedstocks, Wastes, and Algae Ozcan Konur, 2021-05-05 This second volume of the Handbook of Biodiesel and Petrodiesel Fuels presents a representative sample of the population papers in the field of feedstock specific biodiesel fuels The research on feedstocks for biodiesel fuels has first focused on the edible

oils as first generation biodiesel fuels. However, the public concerns about the competition with foods based on these feedstocks and adverse impact on the ecological diversity and deforestation have resulted in the exploration of nonedible oil based biodiesel fuels as second generation biodiesel fuels. In the first instance, due to the ecological and cost benefits of treating wastes, waste oil based biodiesel fuels as third generation biodiesel fuels have emerged. Furthermore, following a series of influential review papers, the research has focused on the algal oil based biodiesel fuels in recent years. Since the cost of feedstocks in general constitutes 85% of the total biodiesel production costs, the research focused more on improving biomass and lipid productivity in these research fields. Furthermore, since water, CO₂ and nutrients, primarily N and P, have been major ingredients for the algal biomass and lipid production, the research has also intensified in the use of wastewaters and flue gases for algal biomass production to reduce the ecological burdens and the production costs. Part 1 presents a representative sample of the population papers in the field of edible oil based biodiesel fuels, covering major research fronts. It covers soybean oil based biodiesel fuels, palm oil based biodiesel fuels, and rapeseed oil based biodiesel fuels as case studies, besides an overview paper. Part 2 presents a representative sample of the population papers in the field of nonedible oil based biodiesel fuels, covering major research fronts. It covers Jatropha oil based biodiesel fuels, pongamia oil based biodiesel fuels, and moringa oil based biodiesel fuels as case studies, besides an overview paper. Part 3 presents a representative sample of the population papers in the field of waste oil based biodiesel fuels, covering major research fronts. It covers wastewater sludge based biodiesel fuels, waste cooking oil based biodiesel fuels, and microbial oil based biodiesel fuels as case studies, besides an overview paper. Part 4 presents a representative sample of the population papers in the field of algal oil based biodiesel fuels, covering major research fronts. It covers algal biomass production in general, algal biomass production in wastewaters, algal lipid production, hydrothermal liquefaction of algal biomass, algal lipid extraction, and algal biodiesel production, besides an overview paper. This book will be useful to academics and professionals in the fields of Energy, Fuels, Chemical Engineering, Physical Chemistry, Biotechnology, and Applied Microbiology, Environmental Sciences, and Thermodynamics. Ozcan Konur is both a materials scientist and social scientist by training. He has published around 200 journal papers, book chapters, and conference papers. He has focused on the bioenergy and biofuels in recent years. In 2018, he edited *Bioenergy and Biofuels*, that brought together the work of over 30 experts in their respective field. He also edited *Handbook of Algal Science, Technology, and Medicine* with a strong section on the algal biofuels in 2020.

Journal of the National Cancer Institute ,1997 *Paper Trade Journal* ,1924 *Commonality and Individuality in Academic Discourse* Maurizio Gotti,2009 This volume explores the relationship between shared disciplinary norms and individual traits in academic speech and writing Despite the standardising pressure of cultural and language related factors academic communication remains in many ways a highly personal affair with active participation in a disciplinary community requiring a multidimensional discourse that combines the professional institutional social and individual identities of its members The first section of the volume deals with tensions involving individual collective values and the analysis of collective vs individual discursual features in academic discourse The second section comprises longitudinal investigations of the academic output of single scholars so as to highlight the individuality in their choices and the reasons for not conforming with the commonality of conventions shared by their professional community The third part deals with genres that are meant to impose commonality on the members of an academic community not only in the drafting of specialized texts but also when these are reviewed or evaluated for possible publication
