Designing the Classroom Curriculum Exploring Curriculum, Assessment and the Incorporation of Technology in Classrooms Mike Howarth, David Lynch, Richard Smith, 2016-05-26 This book is about designing the effective classroom curriculum. The authors argue that an effective classroom curriculum should be the goal of every teacher in every classroom around the world. Effective that is for every student, not just those who find school easy. But how does one go about designing a classroom curriculum that is effective? What are the essential ingredients and how should these ingredients be organised for teaching effect? What role does Technology play in such classroom plans? In this book Lynch, Smith and Howarth provide an insight into these questions by providing a text that focuses on classroom teaching, diagnostic and design strategies. Their intent in writing such a book is to enable the classroom teacher to develop, teach and assess a classroom curriculum where learning success for all students is the central goal. This text is compulsive reading for the teacher who wants to make a difference in their classrooms.

Digital Feedback in the Research Planning Process: Peers, Pedagogies, and Technologies Jennifer Schluer, 2025-08-05 The book *Digital Feedback in the Research Planning Process: Peers, Pedagogies, and Technologies* offers a comprehensive exploration of how iterative dialogic peer review supports academic inquiry at Master's and doctoral levels. To capitalize on participants' heterogeneity, the pedagogical design integrates peer scaffolding within an inquiry-based inverted classroom approach that is situated in an open, digitally mediated feedback environment. Drawing on empirical data from the TESOL Research Colloquium, this study investigates three asynchronous digital feedback formats: cloud-based digital boards, recorded audio-visual files, and online forum exchanges across successive phases of research planning, from topic generation to proposal presentation. The triangulation of student perceptions, feedback analyses, and course evaluations confirms the efficacy of the pedagogical design while highlighting the need for redefined roles of students and supervisors, targeted training in pro-active feedback exchanges, and strategic tool selection based on communicative affordances. Rich with practical suggestions and transferable frameworks, this book equips teacher educators and researchers with actionable insights to promote student agency, peer learning, and the competent use of digital technologies, including Artificial Intelligence, in higher education.

Resources in Education, 2000 Language Assessment in Practice Lyle Bachman, Palmer Adrian, 2022-11-09 *Language Assessment in Practice* enables the reader to become competent in the design, development and use of language assessments. Authors Lyle Bachman and Adrian Palmer have developed an Assessment Use Argument (AUA) as a rigorous justification of how language assessment is used. The authors also demonstrate how the AUA guides the process of test development in the real world.
