Mastering Religious Studies Victor Obi Itambon, 2013 *Revise Religious Studies* John P. Mackney, 1984-01-01 **Get Set for Religious Studies** Dominic Corrywright, 2006-04-13

The transition from RE A level or from entirely alternate roots many RS students have not taken previous RS related courses to Religious Studies at university requires some careful shepherding. The field is huge. This introductory book will provide a clear map for the key features of the terrain. The two main strands shaping the book define what religions are and explain how Religious Studies approaches the religions. The language is clear at the same time as introducing some of the key terminology used in the study of religions. The study of religions and the academic discipline of Religious Studies are growing areas in tertiary education in the UK. The continued interest in RE AS and A level as well as the growth in cognate humanities and social sciences such as Psychology Sociology Philosophy at AS A level and GNVQ level indicates the significant interest amongst students on matters that pertain to culture and humanity in general. Students realise that religion is a driving force in contemporary culture and the study of it is central to understanding the contemporary world. The statistics on religious belief bear out their interest: four billion out of the six billion people who inhabit the world profess religious belief even in the secular societies of the Western world. Religiosity is growing and changing: a recent BBC poll stated that 70% of people in the UK believe in a higher being or spiritual force.

The Religious Studies Skills Book Eugene V. Gallagher, Joanne Maguire, 2018-12-13

Studying religion in college or university. This book shows you how to perform well on your course tests and examinations, write successful papers and participate meaningfully in class discussions. You'll learn new skills and also enhance existing ones which you can put into practice with in-text exercises and assignments. Written by two award-winning instructors, this book identifies the close reading of texts, material culture and religious actions as the fundamental skill for the study of religion at undergraduate level. It shows how critical analytical thinking about religious actions and ideas is founded on careful, patient yet creative reading of religious stories, rituals, objects and spaces. The book leads you through the description, analysis and interpretation of examples from multiple historical periods, cultures and religious traditions, including primary source material such as Matthew 6:9-13, the Lord's Prayer, the Gohonzon scroll of the Japanese new religion Soka Gakkai and the pilgrimage to Mecca hajj. It provides you with typical assignments you will encounter in your studies, showing you how you might approach tasks such as reflective, interpretive or summary essays. Further resources found on the book's website include bibliographies and links to useful podcasts.
