**"This is a seriously crazy-ass film."**

— Richard Rogers, 1959, 1964, 1969

Bargain hunters at Forest Ridge Mall get more than they bargained for: a chatty flasher in a ratty bathrobe. They're required. Security guard Ronnie Barnhardt isn't. "This disgusting pervert is the best thing that ever happened to me!" Catching the flasher may be his ticket to a real police job and to romance with a hot cosmetics-counter princess. Only one thing stands between Ronnie and destiny: a tall, handsome cop who actually knows what he's doing. Beth Rogen (Knocked Up), Anna Faria (the Scary Movie series) and Ray Liotta (GoodFellas) star in this mad-to-well comedy covering acres of wild, sometimes raunchy, up-in-your-grill funny — all under one roof.

**Abstract** The purpose of this study was to determine the effect of a 12-week, low-intensity, supervised walking program on the physical and psychological health of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were 40 sedentary, middle-aged women who were randomly assigned to either a supervised walking program or a control group. The walking program consisted of 12 weeks of supervised walking, 3 times per week, for 30 minutes per session. The control group consisted of 20 women who did not participate in the walking program. The subjects were assessed at baseline and at 12 weeks for physical and psychological health. The physical health assessment included measures of body mass index (BMI), waist circumference, and blood pressure. The psychological health assessment included measures of self-esteem, anxiety, and depression. The results of the study showed that the walking program had a significant positive effect on the physical and psychological health of the subjects. The walking program resulted in a significant decrease in BMI, waist circumference, and blood pressure. The walking program also resulted in a significant increase in self-esteem and a significant decrease in anxiety and depression. The results of this study suggest that a 12-week, low-intensity, supervised walking program can improve the physical and psychological health of sedentary, middle-aged women.
