

# OB Case Study Mrs. Nguyen

Mrs. Nguyen is a 23-year-old woman who presents to labor and delivery with complaints of increasing abdominal pain for the last two days. Upon meeting her, the nurse discovers that Mrs. Nguyen recently moved from China and has not received any prenatal care. She also speaks limited English and is accompanied by her significant other who speaks English fluently.

(1a) What assessment data regarding Mrs. Nguyen's medical and prenatal history should be obtained at this time? (1b) What lab work and tests should be ordered by the doctor?

History should contain any chronic conditions, allergies, medications, social history, etc. Prenatal history should be obtained to assess pregnancy history, STD's, complications with previous pregnancies, etc. Assess for prenatal care in China.

Lab work: Blood type/screen, CBC w/differential, GBS, Rubella, Gonorrhea, Chlamydia, HIV panel, Hepatitis panel, CMP, urine analysis, UDS

After interviewing Mrs. Nguyen and her husband, the nurse discovers that this is her third pregnancy. She has a 4-year-old daughter and the second pregnancy resulted in a fetal demise at 17 weeks gestation.

(2) When calculating her gravida and para, which of the following is the correct?

- A. G2 P0
- B. G2 P1
- C. G3 P2
- D. G3 P1**

Mrs. Nguyen and her husband deny any issues with the current pregnancy and are unsure of the possible cause for the 17-week demise. Mrs. Nguyen appears very somber when asked about her last pregnancy. She does not seem very excited when talking about her current pregnancy either.
