Standards & Objectives

Overarching Question: How does sound energy travel?
Standard Addressed: 4-PS3-2 Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents.

- Objectives:**
- Station 1
To make observations and provide evidence that a sound is a wave that spreads out in all directions.
 - Station 2
To understand that sound waves travel occur through compression and rarefaction.
 - Station 3
To make observations and find evidence that increasing force/energy increases the amplitude.
 - Station 4
To make observations and find evidence that when sound waves travel through the waves are longer, and the sound produced has a lower frequency.
 - Station 5
To make observations and find evidence that dense materials conduct sound better than less dense materials and that sound bounces off flat surfaces better than bumpy and/or rough surfaces.
 - Station 6
To make observations and find evidence that sound travels best through solids, better through liquids, and worst through gases.
