Delphi Complete Harvard Classics and Shelf of Fiction (Illustrated) Charles W. Eliot, 2018-08-01 Regarded by many as the most comprehensive anthology of all time, *The Harvard Classics* was first published in 1909 under the supervision of the Harvard president Charles W. Eliot. An esteemed academic, Eliot had argued that the elements of a liberal education could be gained by spending 15 minutes a day reading from a collection of books that could fit on a five-foot shelf. The publisher P. F. Collier challenged Eliot to make good on this statement, and Dr. Eliot's Five Foot Shelf was the result. Eight years later, Eliot added a further 20 volumes as a sub-collection titled *The Harvard Classics Shelf of Fiction*, offering some of the greatest novels and short stories of world literature. The exhaustive anthology of *The Harvard Classics* comprises every major literary figure, philosopher, religion, folklore, and historical subject up to the twentieth century. This comprehensive eBook presents the complete anthology with Eliot's original introductions, numerous illustrations, rare texts, and the usual Delphi bonus material.  Robert J. Roecklein,2019-02-08 This book is both a careful study of Immanuel Kant s work and the context of that work in the
 movement known as early modern philosophy The chief interest of the author concerns the philosophy of perception that is
 manifest in Kant s doctrines of the transcendental aesthetic and the concept of phenomena Philosophy bears a crucial
 relationship to the public in terms of the evidence that it identifies as original and binding In the early modern period
 philosophy repudiated its dependence on ordinary perception and on language as ordinarily used in the setting forth of its
 own authority This historiographical fact is presently of immense interest as public discourse finds itself rudderless and
 without agreed upon common facts for deliberation to settle on It was not the view of the ancient Greeks that philosophy
 could so emancipate itself from the perception of common facts as the original evidence for higher investigations The Early
 Modern era beginning with Bacon but now more furiously in the work of Kant has anchored a general indictment of ordinary
 perception in a remnant of natural philosophy Human beings in Kant s philosophy are not capable of knowing what objects

external objects are in themselves We may only know what are called appearances and Kant refers to these appearances as phenomena Yet this claim is complicated by the a priori knowledge which Kant claims to possess as regards these phenomena that they must all be eternal substances The book freely moves back and forth between Greek antiquity and the Early Modern period to illustrate the full nature of the rupture on this ground of the metaphysics of fact determination For Aristotle the founder of the theory of substance substances are just the perishable bodies commonly perceived Kant s phenomena which claims to embody what appears to the generality of the human race cannot be that for the human race does not perceive eternal objects Adulteration of Food Products ...
