Responsibility To Protect A Defense:

The Responsibility to Protect Alex J. Bellamy, 2015 The Responsibility to Protect R2P principle is the international community's major response to the problem of genocide and mass atrocities a problem seen in Bosnia Rwanda and more recently in Syria This book argues that although it is far from perfect R2P offers the best chance we have of building an international community that works to prevent these crimes and protect vulnerable populations To make this argument the book sets out the logic of R2P and its key ambitions examines some of the critiques of the principle and its implementation in situations such as Libya and sets out ways of overcoming some of the practical problems associated with moving this principle from words into deeds

The Oxford Handbook of the Responsibility to Protect Alex Bellamy, Tim Dunne, 2016-06-30 The Responsibility to Protect R2P is intended to provide an effective framework for responding to crimes of genocide ethnic cleansing war crimes and crimes against humanity It is a response to the many conscious shocking cases where atrocities on the worst scale have occurred even during the post 1945 period when the United Nations was built to save us all from the scourge of genocide The R2P concept accords to sovereign states and international institutions a responsibility to assist peoples who are at risk or experiencing the worst atrocities R2P maintains that collective action should be taken by members of the United Nations to prevent or halt such gross violations of basic human rights This Handbook containing contributions from leading theorists and practitioners including former foreign ministers and special advisors examines the progress that has been made in the last 10 years it also looks forward to likely developments in the next decade

The Responsibility to Protect Alex J. Bellamy, 2014 The Responsibility to Protect R2P principle is the international community's major response to the problem of genocide and mass atrocities Although far from perfect this book argues that R2P offers the best chance we have of building an international community that works to prevent these crimes and protect vulnerable populations

Human Freedom and World Peace under the Nuclear Threat Jiang Rongchang, Zhou Qingyun, Zhao Liangjie, 2023-04-04 This discussion has been running with high intensity for half a year since the Russian invasion of Ukraine Since then the world is under the unclear threat by Russia What can human do to deal with this problem Based on a rigorous argument for the right of self defense this book proposes the establishment of a human freedom fund to activate the civil military rights that all human beings necessarily hold as a free person to build a new separation of powers system that can effectively check the usurped political forces of the powerful state This new system of separation of three powers will allow all human beings to become modern homo erectus put an end to the historical fate of individual human lives and put an end to the possibility of various forms of alienated power enslaving human beings

Critical Masses and Critical Choices Kerry G. Herron, Hank C. Jenkins-Smith, 2010-11-23 Critical Masses and Critical Choices examines American attitudes on issues of national and international security Based on over 13 000 in depth interviews conducted over a ten year period Kerry Herron and Hank Jenkins Smith have created a unique and rich set of data providing insights into public opinion on nuclear deterrence terrorism and other security issues from the end of the Cold War to the present day Their goal is to shed light not only on changes in public opinion about a range of security related policy issues but also to gauge the depth of the public's actual understanding of these matters Prior to this study the predominant view held that the American people were incapable of articulate and consistent thought on complex political subjects This book overturns that notion and demonstrates the sometimes surprisingly cogent positions held by ordinary members of the public on intricate national issues The book's solid data based on long term studies combined with crisp writing and often startling conclusions will appeal to a wide range of readers scholars journalists and policy makers Critical Masses and Critical Choices is the definitive account of the change in public perceptions on security threats and reactive strategies from the early 1990s to the post 9 11 period This broad and highly original study will prove an indispensable tool for policy makers and scholars alike

Routledge Handbook of Ethics and War Fritz Allhoff, Nicholas G. Evans, Adam Henschke, 2013-06-26 This new Handbook offers a comprehensive overview of contemporary extensions and alternatives to the just war tradition in the field of the ethics of war The modern history of just war has typically assumed the primacy of four particular elements *jus ad bellum* *jus in bello* the state actor and the soldier This book will put these four elements under close scrutiny and will explore how they fare given the following challenges What role do the traditional elements of *jus ad bellum* and *jus in bello* and the constituent principles that follow from this distinction play in modern warfare Do they adequately account for a normative theory of war What is the role of the state in warfare Is it or should it be the primary actor in just war theory Can a just war be understood simply as a response to territorial aggression between state actors or should other actions be accommodated under legitimate recourse to armed conflict Is the idea of combatant *qua* state employed soldier a valid ethical characterization of actors in modern warfare What role does the technological backdrop of modern warfare play in understanding and realizing just war theories Over the course of three key sections the contributors examine these challenges to the just war tradition in a way that invigorates existing discussions and generates new debate on topical and prospective issues in just war theory This book will be of great

interest to students of just war theory war and ethics peace and conflict studies philosophy and security studies

Fiduciaries of Humanity Evan J. Criddle, Evan Fox-Decent, 2016 Public international law has embarked on a new chapter Over the past century the classical model of international law which emphasized state autonomy and interstate relations has gradually ceded ground to a new model Under the new model a state's sovereign authority arises from the state's responsibility to respect protect and fulfill human rights for its people In *Fiduciaries of Humanity* How International Law Constitutes Authority Evan J Criddle and Evan Fox Decent argue that these developments mark a turning point in the international community's conception of public authority Under international law today states serve as fiduciaries of humanity and their authority to govern and represent their people is dependent on their satisfaction of numerous duties the most general of which is to establish a regime of secure and equal freedom on behalf of the people subject to their power International institutions also serve as fiduciaries of humanity and are subject to similar fiduciary obligations In contrast to the receding classical model of public international law which assumes an abiding tension between a state's sovereignty and principles of state responsibility the fiduciary theory reconciles state sovereignty and responsibility by explaining how a state's obligations to its people are constitutive of its legal authority under international law The authors elaborate and defend the fiduciary model while exploring its application to a variety of current topics and controversies including human rights emergencies the treatment of detainees in counterterrorism operations humanitarian intervention and the protection of refugees fleeing persecution *Yale Law Journal: Volume 124, Number 1 - October 2014* Yale Law Journal, 2014-11-04 The October 2014 issue of The Yale Law Journal the first for academic year 2014 2015 features new articles notes and comments on law and legal theory Contents include Article Self Help and the Separation of Powers by David E Pozen Article Criminal Attempts by Gideon Yaffe Note The Rise of Institutional Mortgage Lending in Early Nineteenth Century New Haven by Steven J Kochevar Comment SEC Monetary Penalties Speak Very Loudly But What Do They Say A Critical Analysis of the SEC's New Enforcement Approach by Sonia A Steinway Comment Contract After Concepcion Some Lessons from the State Courts by James Dawson This quality ebook edition features linked notes active Contents active URLs in notes and proper Bluebook formatting The Oct 2014 issue is Volume 124 Number 1 *The War between Russia and Ukraine* Nicole Kunkel, Torsten Meireis, 2025-08-18 Depending on the global but also the European context peace ethical perspectives on the Russian Ukrainian war differ considerably While many Northern Western Middle and South Eastern European states stress the illegitimacy and illegality of Russia's invasion in Ukraine according to international law some European and many states in the global South and East take a different stance Thus important international agents like South Africa have abstained from voting on UN resolution A RES ES 11 1 March 2nd 2022 and also the renewed resolution A ES 11 L 7 February 23rd 2023 Brazil's president Lula da Silva claims neutrality in the conflict South African officials understand Russia as a long standing ally and the conflict as a recalibration of the global order and they don't stand alone with that view This book brings

together voices from theology political science and peace ethics from three continents for an intercontinental public theological and interdisciplinary conversation on peace ethics that takes decolonial perspectives into account without giving up claims of universal validity of human rights

Outsourcing War Amy E. Eckert, 2016-02-19 Recent decades have seen an increasing reliance on private military contractors PMCs to provide logistical services training maintenance and combat troops In *Outsourcing War* Amy E Eckert examines the ethical implications involved in the widespread use of PMCs and in particular questions whether they can fit within customary ways of understanding the ethical prosecution of warfare Her concern is with the ius in bello right conduct in war strand of just war theory Just war theorizing is generally built on the assumption that states and states alone wield a monopoly on the legitimate use of force Who holds responsibility for the actions of PMCs What ethical standards might they be required to observe How might deviations from such standards be punished The privatization of warfare poses significant challenges because of its reliance on a statist view of the world Eckert argues that the tradition of just war theory which predates the international system of states can evolve to apply to this changing world order With an eye toward the practical problems of military command Eckert delves into particular cases where PMCs have played an active role in armed conflict and derives from those cases the modifications necessary to apply just principles to new agents in the landscape of war
