Public Interests in International Investment Law Qiang Ren, 2019-01-17 Are conflicts between the old capitalists and new money manifest in today's economy Are investment treaties which have traditionally been used to protect capital exporting states now beginning to cause unwelcome side effects for them International investment law has long been held as an economic and political instrument in the regime of international investment with international investment treaties having been concluded to protect foreign investment and investors for a substantial period of time However the emerging new economic powers from the Third World are causing this to change Taking the unique perspective of environmental protection in host states against states obligations to protect and promote foreign investments under the existing international investment treaty practice and dispute settlement practices this book examines this inescapable conflict This is the first major work in this field to interpret investment treaty provisions by introducing environmental reflection It offers proposals for rethinking and reshaping the current pro investor international investment law through taking up broad environmental exceptions

Comparative Climate Change Litigation: Beyond the Usual Suspects Francesco Sindico, Makane Moïse Mbengue, 2021-01-21 This book is based on the acknowledgment that climate change is a multifaceted challenge that requires action on the part of all stakeholders including civil society and the notion that climate change is at a tipping point with urgent measures needed in the next decade Against this background civil society is turning its attention to the courts as a means to directly influence climate action partly because of the global scepticism towards the progress of global climate action despite the ongoing implementation of the Paris Agreement Focusing on the individual broadly representing civil society the book offers fresh perspectives on climate change litigation While most of the literature on climate change litigation examines the same specific jurisdictions mostly common law countries US and Australia in particular this book also considers specific countries in Asia Africa and Latin America with little or no climate change litigation It explores the reasons for the lack of litigation and discusses what measures should or could be taken to change this situation and push forward climate action Unlike other literature on the subject this book analyses climate change litigation using a scenario based methodology Combining rigorous academic analysis with a practical policy oriented focus the book provides valuable insights for a wide range of stakeholders interested in climate change litigation It

appeals to civil society organisations around the world international organisations and law firms interested in climate change litigation **Congressional Record** ,
