notion Holzman puts to rest with a marble carving experiment that recreated the volutes of one capital Rather he argues that hybrid capitals represented an important parallel to other trends in Greek art notably bilingual Attic vases which combined older and newer painting techniques for sheer visual delight By studying the chiaroscuro carving effects and painted polychrome decoration of Ionic architecture Holzman shows that ancient viewers were primed to look for differences in such details which the book illustrates with many original drawings and diagrams Exploring works of Ionic architecture from different periods in Ionia the Cyclades Athens and the Northern Aegean Retrospective Columns demonstrates that their builders ultimately returned to outmoded elements to establish continuity with the past reinforcing community identities and architectural tradition
