Resource Management for School Administrators Tomal/Schilling, **Terra Nova** Eric W. Sanderson, 2013-06-04 A look at what the American lifestyle has done to the environment and how to move toward a better future. In the last century, three powerful forces—oil, cars, and suburbs—buoyed the American dream. Yet now the quality of life in the United States is declining due to these same three forces. Our dependence on oil is a root cause of wars, recessions, and natural disasters. Cars consume an outsized share of our incomes and force us to squander time in traffic. Meanwhile, expensive sprawl devours farmland and in a vicious cycle further entrenches our reliance on cars and oil. In *Terra Nova*, conservation ecologist Eric W. Sanderson, the national bestselling author of *Mannahatta*, offers concrete steps toward a solution. He delves into natural history, architecture, chemistry, and politics to show how the American relationship to nature has shaped our past and how it can affect our future. Illustrated throughout with maps, charts, and infographics, *Terra Nova* demonstrates that it is indeed possible to achieve a better world. Sanderson commendably outlines a new way of life designed to sustain American prosperity, health, and freedom for generations to come. Publishers Weekly
