3. Although this TV set meets the latest DVB-T and DVB-C standards, as of August, 2009, the compatibility with future DVB-T digital terrestrial and DVB-C digital cable broadcasts cannot be guaranteed.

Constant displaying of still picture can cause ghosting of LCD screen, which will affect image quality. To reduce risk of this effect, please follow below recommendations:

- Always try to display any image on full screen, use TV set picture format menu for best possible result.
- Reduce brightness and contrast values to minimum required to achieve desired picture quality; exceeded values may speed up the burnout process.
- Frequently use all TV features designed to reduce image retention and screen burnout, refer to proper user manual section for details.
- ④ **WARNING:** Image retention, commonly known as screen burn-in, can occur on most types of television if the same image is displayed continuously. The most common causes of image retention are logos that remain stationary on the TV screen. These logos are common on many programmes received via a Set-top Box. To reduce this risk, avoid displaying still images for long durations and lower the brightness or contrast settings to decrease the intensity of the pictures. Extended viewing of movies and programs in aspect ratios that are different from the aspect ratio of the TV may cause image retention. Always endeavour to avoid black borders top or bottom by using the zoom function. This will help eliminate the black borders and fit the pictures to the entire area of
