Research Handbook on the Law of Virtual and Augmented Reality Woodrow Barfield, Marc Jonathan Blitz, 2018-12-28 Virtual and augmented reality raise significant questions for law and policy When should virtual world activities or augmented reality images count as protected First Amendment speech and when are they instead a nuisance or trespass When does copying them infringe intellectual property laws When should a person or computer face legal consequences for allegedly harmful virtual acts The Research Handbook on the Law of Virtual and Augmented Reality addresses these questions and others drawing upon free speech doctrine criminal law issues of data protection and privacy legal rights for increasingly intelligent avatars and issues of jurisdiction within virtual and augmented reality worlds

Brain Stimulation and Behavioral Change Claudio Lucchiari, Nicholas J. Kelley, Maria E. Vanutelli, Roberta Ferrucci, 2019-05-15 The eBook entitled Brain Stimulation and Behavioral Change is a collection of articles about the use of transcranial electric stimulation tES to change behaviors and face pathological conditions to enhance cognition and to explore cerebral functions using safe and non invasive brain modulation techniques The tESs include transcranial direct current stimulation tDCS transcranial alternate current stimulation tACS and due to the way it induces changes in the brain Transcranial Magnetic Stimulation TMS The use of tES has recently exploded Certainly one reason for this explosion of research is that it is a cheap way to change behavior However on the other hand we still know very little about the neural mechanisms that underlie tES The present eBook includes both original studies and reviews It covers a wide scope of arguments including studies aimed at testing the potential ability of tES in mitigating physical and psychiatric symptoms and to support neurological rehabilitation enhancing reading abilities motor abilities and creativity Furthermore some contributions about the role of tES in discovering and mapping the neuro functional correlates of higher cognitive functions are also included The common background of the contributions included in the eBook lies in the idea that we need sound scientific evidence about how to move these techniques from labs to real life contexts Addressing these issues and understanding the real potentialities of tES in clinical and non clinical applications require a significant cross fertilization between disciplines We hope this eBook will be able to boost the discussion on this vital topic

an individual mood and a wider structure of feeling that drives participation across media networks It identifies the range of cultural techniques for codifying classifying sensing and pre-empting boredom as well as those that teach users counter-intuitively to embrace boring media as a means of coping with the intensities of always-on existence However if boredom is positioned in a digital network culture as a feeling that keeps driving us back to our social media feeds it is important to ask how else it might operate While the technological affordances of computational media have put pressure on our ability to conceive of boredom as a radical challenge to digital capitalism this book attempts to think about the potential that might still be embedded in boredom's capacity to temporarily suspend or to neutralize dominant structures of attention and affect Building on the work of Giorgio Agamben Byung Chul Han Roland Barthes and from historical accounts of boredom and entertainment the book provides a new understanding of boredom in the context of networked media *Ephemeral Media* Paul Grainge, 2017-10-20 *Ephemeral Media* explores the practices strategies and textual forms helping producers negotiate a fast-paced mediascape Examining dynamics of brevity and evanescence in the television and new media environment this book provides a new perspective on the transitory and transitional nature of screen culture in the early twenty-first century
