Saving Cascadia A Novel English Edition:

Saving Cascadia John J. Nance, 2005-03-03 A few hundred years ago Cascadia Island didn't even exist. Like the Washington seacoast, it was rock submerged beneath the Pacific. A massive earthquake changed that, exploding the rock upward, making it land unstable. According to seismologist Dr. Doug Lam, Lam has spent years researching the Cascadia Subduction Zone. He published a theory that the unrelieved tectonic strain beneath the idyllic landscape of Cascadia Island could be triggered with modern construction processes with catastrophic results. The paper was disregarded, even ridiculed by his peers and by megawealthy developer Mick Walker, who stands to earn millions from the construction of a luxury resort on Cascadia. The elegant casino hotel and convention center will reap millions for him, even if the tiny island only lasts for a short time. When a series of earthquakes begins to shake the Northwest Corridor, Doug's worst fears are confirmed. In an attempt to convince Walker to evacuate Cascadia immediately, Doug hurries to join guests arriving for the resort's grand opening. As the tremors wreak havoc across the Northwest coastal area, the military is left with too few resources to assist the people on Cascadia. Convinced that the island will be in ruins within hours, Doug reluctantly calls upon his girlfriend Jennifer Lindstrom, president of Nightingale Aviation, a major medical transport helicopter company, for help. With snow falling, visibility dropping, and winds increasing, Doug embarks on an impossible mission with Jennifer and Nightingale's helicopters to evacuate over three hundred people while smaller earthquakes continue to herald the approach of a catastrophic tsunami. John J. Nance hurtles readers along a nail-biting quest to rescue hundreds of stranded vacationers and resort staff. Meticulously researched and with the signature authenticity only a veteran pilot could provide, *Saving Cascadia* is a hair-raising thriller of awesome magnitude. **Children's Books in Print, 2007**, 2006 *Orbit* John J. Nance, 2007 The bestselling author of *Pandora's Clock* returns with a riveting thriller set in the world of commercial spaceflight. The year is 2009, and when a micrometeorite punches through the wall of a just-launched spacecraft, killing the pilot passenger Kip Dawson, he discovers he is truly alone. **Saving Liberalism from Itself** Timothy Stacey, 2022-06-01 Available Open Access digitally under CC BY-NC-ND licence. In the wake of populism, Timothy Stacey's book critically reflects on what is missing from the liberal project with the aim of saving liberalism. It explains that populists have harnessed myth, ritual, magic, and tradition to advance their ambitions and why opponents need to embrace rather than eschew them. Using examples of liberally oriented activists in Vancouver, it presents an accessible theorization of these quasi-religious concepts in secular life. The result is to provide both a new theoretical understanding of why liberalism fails to engage people and a toolkit for campaigners, policymakers, and academics seeking to bridge the gap between liberal aspirations and lived experiences in order to promote political engagement and to create unity out of division. Copyright Office, 1977 *Simple Solutions* Patrick Kenji Takahashi, 2007-08-30 *Simple Solutions For Planet Earth* is a scientific book written in a popular style for the average reader. You have read about Peak Oil and Global

Climate Warming and complained about 4 gallon gasoline but how really serious are these headlines and annoyances The author has worked his entire career on the science technology education administration and politics of these subjects and crystallizes this complex field into understandable elements providing simple solutions for humanity Does it make sense for the renewable energy budget of the Federal Government to be about 1 billion year when o Annual tax incentives and government programs for the oil industry are supposedly in the range between 38 billion and 115 billion although Lester Brown says 210 billion in 2005 o Farm subsidies alone in 2004 cost taxpayers 16 2 billion o Our country spends 12 billion a month or 144 billion year on the Iraq and Afghanistan wars ostensibly to protect oil only to raise prices The author s long experience with the Greenhouse Effect has led him to believe that methane not carbon dioxide could well be the critical gas of concern for there is potential for global warming to cascade into what he terms the Venus Syndrome The closing chapter speculates on a hypothesis regarding mega tsunamis 100 meter waves from landslides While simple solutions are suggested the problem is the inability of our civilization to agree on a workable strategy which is further weakened by the lack of will on part of the general populace Thus the reader is urged to help make that crucial difference Instructions and examples are provided on how to attain Rainbow Vision to carry out this mission for a better Planet Earth The simplest solution is for everyone to join in on the effort

investigates how narratives in genres such as the novel and the short story employ formal devices to effectively channel the entanglement of human communities and nonhuman phenomena How can narrative undermine linearity in order to reject notions of unlimited technological progress and economic growth What does it mean to say that nonhuman materials and processes from contaminated landscapes to natural evolution can become characters in stories And conversely how can narrative trace the rising awareness of climate change in the thick of human characters mental activities These are some of the questions Narrating the Mesh addresses by engaging with contemporary works by Ted Chiang Emily St John Mandel Richard Powers Jeff VanderMeer Jeanette Winterson and many others Entering interdisciplinary debates on narrative and the Anthropocene this book explores how stories can bridge the gap between scientific models of the climate and the human scale world of everyday experience powerfully illustrating the complexity of the ecological crisis at multiple levels
