Resources in Education ,1991-04

Central Station ,1922

Doing Good Science in Middle School, Expanded 2nd Edition Olaf Jorgenson, Rick Vanosdall, Vicki Massey, Jackie Cleveland, 2014-04-01 We are among those who have come to enjoy the blossoming intellects often comical behaviors and insatiable curiosity of middle schoolers and choose to work with them With

more than 130 years of combined experience in the profession we've gathered a lot of ideas to share. We know from our interactions with educators around the country that precious few quality resources exist to assist science teachers in the middle and this was a central impetus for updating *Doing Good Science in Middle School*. From the preface: This lively book contains the kind of guidance that could only come from veterans of the middle school science trenches. The authors know you're crazy busy so they made the book easy to use whether you want to read it cover to cover or pick out sections to help you with lesson planning and classroom management. They also know you face new challenges so they thoroughly revised this second edition to meet the needs of today's students. The book contains big picture concepts such as how to understand middle school learners and explore the nature of science with them; a comprehensive overview of science and engineering practices; STEM and inquiry-based middle school science instruction aligned with A Framework for K-12 Science Education and the Next Generation Science Standards; 10 new and updated teacher-tested activities that integrate STEM with literacy; skill-building information on best instructional practices and professional development resources and connections to the Common Core State Standards in English language arts and mathematics. If you're a new teacher, you'll gain a solid foundation in how to teach science and engineering practices while better understanding your often enigmatic middle grade students. If you're a veteran teacher, you'll benefit from a fresh view of what your colleagues are doing in new times. Either way, *Doing Good Science in Middle School* is a rich opportunity to reaffirm that what you do is good science.

This resource has four instructional units: Unit 1 Habitats and Communities; Unit 2 Pulleys and Gears; Unit 3 Light and Sound; Unit 4 Rocks and Minerals. Each unit is divided into lessons that focus on specific curricular expectations. Each lesson has curriculum expectations, lists materials, lists activity descriptions, assessment suggestions, activity sheets, and graphic organizers.

Online Science Learning: Best Practices and Technologies Downing, Kevin, Holtz, Jennifer, 2008-05-31. The continued growth in general studies and liberal arts and science programs online has led to a rise in the number of students whose science learning experiences are web-based. However, little is known about what is actually going on in web-based science courses at the level of the disciplines within liberal arts and sciences or the corresponding course design features. *Online Science Learning: Best Practices and Technologies* reviews trends and efforts in web-based science instruction and evaluates contemporary philosophies and pedagogies of online science instruction. This title, on an emergent and vital area of education, clearly demonstrates how to enrich the academic character and quality of web-based science instruction.
