Characterizing the Robustness of Science Léna Soler, Emiliano Trizio, Thomas Nickles, William Wimsatt, 2012-03-22 Mature sciences have been long been characterized in terms of the successfulness reliability or trustworthiness of their theoretical experimental or technical accomplishments Today many philosophers of science talk of robustness often without specifying in a precise way the meaning of this term This lack of clarity is the cause of frequent misunderstandings since all these notions and that of robustness in particular are connected to fundamental issues which concern nothing less than the very nature of science and its specificity with respect to other human practices the nature of rationality and of scientific progress and science's claim to be a truth conducive activity This book offers for the first time a

comprehensive analysis of the problem of robustness and in general that of the reliability of science based on several detailed case studies and on philosophical essays inspired by the so called practical turn in philosophy of science **Mosby's Essential Sciences for Therapeutic Massage - E-Book** Sandy Fritz,Luke Allen Fritz,2024-05-28 Get the science background you need to master massage therapy Mosby's Essential Sciences for Therapeutic Massage 7th Edition provides full color easy to read coverage of anatomy and physiology biomechanics kinesiology and pathologic conditions for the entire body Realistic examples apply A P content directly to the practice of massage therapy and learning activities help you review key material and develop critical thinking skills Written by noted massage therapy educators Sandy Fritz and Luke Allen Fritz this guide provides a solid foundation in the sciences and positions you for success on licensing and certification exams Updated and streamlined MBLEx preparation questions at the end of each chapter with additional questions available on the companion Evolve website prepare you for licensure Updated pathologies reflect what you will see in the field as a practitioner Focus on essential content helps you study for and pass licensing and certification exams including the Massage and Bodywork Licensing Examination MBLEx and Board Certification in Therapeutic Massage and Bodywork BCTMB Comprehensive coverage of biomechanics includes gait assessment and muscle testing activities along with critical thinking questions and end of chapter case studies Vibrant art program features more than 660 line drawings and photos showing muscle locations attachments and actions required knowledge for passing certification exams and for practicing massage therapy Sections on pathologic conditions include suggestions for referral protocols as well as indications and contraindications for therapeutic massage Teaching Science for Understanding James Joseph Gallagher,2007 Offers middle and high school science teachers practical advice on how they can teach their students key concepts while building their understanding of the subject through various levels of learning activities Food Proteins and Their Applications Srinivasan Damodaran,2017-10-19 Reviews the physiochemical properties of the main food proteins and explores the interdependency between the structure function relationship of specific protein classes and the processing technologies applied to given foods The book offers solutions to current problems related to the complexity of food composition preparation and storage and includes such topics as foams emulsions gelation by macromolecules hydrolysis microparticles fat replacers protein based edible films and extraction procedures **Abstraction in Science and Art** Chiara Ambrosio,Julia Sánchez-Dorado,2024-09-30 This volume explores the roles and uses of abstraction in scientific and artistic practice Conceived as an interdisciplinary dialogue between experts across histories and philosophies of art and science this collection of essays draws on the shared premise that abstraction is a rich and generative process not reducible to the mere omission of details in a representation When scientists attempt to make sense of complex natural phenomena they often produce highly abstract models of them In the history and philosophy of art there is a long tradition of debate on the function of abstraction and more recently its relation with theories of depiction Adopting a process oriented perspective the chapters

in this volume explore the epistemic potential of a diversity of practices of abstracting The systematic analysis of a wide range of historical cases from early twentieth century abstractionist painting to contemporary abstract photography and from nineteenth century physics to recent research in biology and neurosciences invites the reader to reflect on the material lives of abstraction through concrete artefacts experimental practices and theoretical and aesthetic achievements Abstraction in Science and Art Philosophical Perspectives will be of interest to scholars and advanced students working in aesthetics philosophy of science and epistemology as well as to historians of science and art and to practicing artists and scientists interested in exploring foundational questions at the heart of the creative practice of abstracting The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license Open access for this book was funded by University College London
