A History of Scientific Journals Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03
Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history Scientific Journals Tony Stankus, 1987 **List of scientific journals, with abbreviated titles, compiled for the use of the recorders** Zoological record association, 1873

H. Campbell, Jane Edmisten, 1964 Characteristics of Scientific Journals, 1949-1959 National Science Foundation (U.S.). Office of Science Information Service, 1964 Scientific Journals in the United States Donald W. King, Dennis D. McDonald, Nancy K. Roderer, 1981 **Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis** Giorgos Kouropoulos, Γιώργος Κουρόπουλος, 2017-12-15 The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis Regression analysis allows the option of investigating and predicting

the numerical relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals A sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure In this study two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals Alexa rank and Statscrop rank The electronic databases through the internet constitute the main information resources of this study about the impact factors The general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the World Wide Web Furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non linearly correlation Even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Scholarly communication Das, Anup Kumar,2015-04-27 Traducci n parcial de la Introducci n Una de las tareas de todo trabajo de investigaci n es la comunicaci n de los resultados al resto de los colegas es decir compartir los hallazgos con los dem s de una manera establida que se conoce popularmente como comunicaci n cient fica La comunicaci n cient fica surgi con la publicaci n de la primera revista Le Journal des s avans en 1665 Sin embargo el t rmino gan popularidad en la d cada de 1970 con a incorporaci n a las revistas de comit s cient ficos y la revisi n inter pares Este m dulo cuenta con cuatro unidades que cubren introducci n a la comunicaci n acad mica revistas cient ficas revistas y bases de datos electronicas y la crisis de las publicaciones seriadas Al final de este m dulo se espera que el alumno sea capaz de Explicar la filosof a misi n y objetivos de la comunicaci n cient fica Describir el proceso de la comunicaci n cient fica Identificar los diferentes canales de comunicaci n acad mica Discutir la disfunci n de la comunicaci n acad mica En la Unidad 1 Introducci n a la comunicaci n cient fica se habla de diferentes aspectos de la comunicaci n acad mica especialmente su g nesis la importancia y la tica de las publicaciones acad micas y diferentes canales de comunicaci n disponibles en la publicaci n acad mica Algunos de estos canales se describen

habitualmente como fuentes primarias ya que proporcionan un testimonio de primera mano o evidencia directa en relación con un tema que se investiga. Históricamente las revistas científicas fueron creadas por las sociedades científicas y otras comunidades académicas para informar de los resultados de sus trabajos de investigación concluidos o descubrimientos científicos. En la actualidad son editores privados con fines de lucro quienes han creado las principales revistas de investigación.

Unidad 2: Comunicación con Peer Review abarca dos importantes canales de publicación académica:

1. Revisión por pares en revistas, conferencias y sus procedimientos.
2. Diferentes métodos y procedimientos de revisión por pares para la publicación de literatura primaria surgidos de los estudios de investigación.

La revisión por pares es esencial para la validación de la calidad de los resultados de investigación transmitidos por otros investigadores que están sujetos al cumplimiento de las normas éticas y a la utilización de la metodología de investigación apropiada. En la Unidad 3, Revistas y bases de datos electrónicas se analiza la aparición de publicaciones periódicas de ámbito académico y de investigación debido a la gran proliferación de las tecnologías de la información y la comunicación TIC. Las comunidades científicas y comunicaciones científicas de los países del sur están recibiendo atenciones sustantivas a través de la adaptación de las revistas electrónicas y bases de datos electrónicas en el proceso de la comunicación de la investigación. En la Unidad 4, la Crisis de Publicaciones Seriadas se discute el coste de publicaciones revisadas por pares y los problemas que enfrentan los investigadores de los países en desarrollo. El objetivo de esta unidad es destacar los problemas y discutir posibles soluciones incluyendo la aparición de acceso abierto como una de las soluciones, pues abrir la publicación de revistas ayuda a mitigar algunos de los problemas asociados con la crisis de las publicaciones seriadas.

Trad. Julio Alonso Arvalo, Univ. Salamanca. *Comprehensive Index to the American Journal of Science, 1818-1995*. Pasquale De Marco, 2025-07-25. The American Journal of Science is one of the world's oldest and most respected scientific journals. Founded in 1818, the journal has published original research articles in all fields of science and its articles are widely cited by scientists around the world. This comprehensive index to the American Journal of Science covers the period from 1818 to 1995 and includes over 100,000 entries. The index is organized alphabetically by author and each entry includes the title of the article, the volume and issue number in which it was published, and the page numbers. In addition to the main index, this volume also includes a comprehensive subject index which allows readers to search for articles on specific topics. The subject index is organized alphabetically by keyword and each entry includes a list of the articles that are relevant to that keyword. This comprehensive index is an essential resource for anyone interested in the history of American science or the role of scientific journals in the dissemination of knowledge.

Pasquale De Marco's meticulous research and engaging writing style make this book a pleasure to read for both scholars and general readers alike.

Key Features:

- Covers the period from 1818 to 1995.
- Includes over 100,000 entries.
- Organized alphabetically by author.
- Includes a comprehensive subject index.

Essential resource for anyone interested in the history of American science or the role of scientific journals in the dissemination of knowledge. If you like this book, write a review.

Directory of Scholarly

Journals in Turkey Metin Kozak, Nazmi Kozak, 2017-03-07 Scholarly journals are the capillaries of the scientific world ensuring the circulation of knowledge. Moreover, scholarly journals guide and indicate the scientific development in an academic field of study or in a country. Scholarly journals which transfer and spread scientific information are intended to properly fulfill their functions, preventing the transfer of imperfect or incorrect information to the science world. Significant issues are therefore inevitable in the characteristics of scientific studies in such disciplines and countries where the scholarly journals do not fulfill their functions properly. This study encompasses all scholarly journals published in Turkey in all fields of science and other disciplines. The reference questions in this study are grouped under three main categories: the content and publication information, article evaluation, and publishing information. The number of journals in this present study totals 1910.

Writing and Publishing Scientific Papers Gábor Lövei, 2021-05-19 Gábor Lövei's scientific communication course for students and scientists explores the intricacies involved in publishing primary scientific papers and has been taught in more than twenty countries. Writing and Publishing Scientific Papers is the distillation of Lövei's lecture notes and experience gathered over two decades; it is the coursebook many have been waiting for. The book's three main sections correspond with the three main stages of a paper's journey from idea to print: planning, writing, and publishing. Within the book's chapters, complex questions such as "How to write the introduction" or "How to submit a manuscript" are broken down into smaller, more manageable problems that are then discussed in a straightforward, conversational manner, providing an easy and enjoyable reading experience. Writing and Publishing Scientific Papers stands out from its field by targeting scientists whose first language is not English. While also touching on matters of style and grammar, the book's main goal is to advise on first principles of communication. This book is an excellent resource for any student or scientist wishing to learn more about the scientific publishing process and scientific communication. It will be especially useful to those coming from outside the English-speaking world and looking for a comprehensive guide for publishing their work in English. *The London, Edinburgh and Dublin Philosophical Magazine and Journal of Science*, 1881

Science Dynamics and Research Production Nikolay K. Vitanov, 2016-08-01 This book deals with methods to evaluate scientific productivity. In the book, statistical methods, deterministic and stochastic models, and numerous indexes are discussed that will help the reader to understand the nonlinear science dynamics and to be able to develop or construct systems for appropriate evaluation of research productivity and management of research groups and organizations. The dynamics of science structures and systems is complex, and the evaluation of research productivity requires a combination of qualitative and quantitative methods and measures. The book has three parts. The first part is devoted to mathematical models describing the importance of science for economic growth and systems for the evaluation of research organizations of different size. The second part contains descriptions and discussions of numerous indexes for the evaluation of the productivity of researchers and groups of researchers of different size up to the comparison of research productivities of research communities of nations. Part three

contains discussions of non Gaussian laws connected to scientific productivity and presents various deterministic and stochastic models of science dynamics and research productivity The book shows that many famous fat tail distributions as well as many deterministic and stochastic models and processes which are well known from physics theory of extreme events or population dynamics occur also in the description of dynamics of scientific systems and in the description of the characteristics of research productivity This is not a surprise as scientific systems are nonlinear open and dissipative
