The Spectator ,1899 **California Journal of Development** ,1928 **Pharmaceutical Journal** ,1900 *The Public Understanding of Assessment* John Gardner,2017-10-02 Assessment of educational achievement whether by traditional examinations or by teachers in schools attracts considerable public interest particularly when it is associated with high stakes outcomes such as university entry or selection for employment When the individual s results do not chime with their or their teachers expectations doubts creep in about the process of assessment that has arrived at this result However educational assessment is made up of many layers of complexity which are not always clear to the general public including teachers students and parents and which are not easily understood outside of the expert assessment community These layers may be organized in highly co dependent relationships that include reliability validity human judgment and errors and the uses and interpretations of the various types of assessment No one could reasonably argue that the principles and

complexities of educational assessment should be core learning in public education but there is a growing realization that trust in the UK assessment system is under some threat as the media and others sensationalize or politicize any problems that arise each year This book offers the first comprehensive overview of how the general public is considered to perceive and understand a wide variety of aspects of educational assessment and how this understanding may be improved This book was originally published as a special issue of the Oxford Review of Education Legal Education in the Global Context
Professor Christopher Gane, Professor Hui Huang, 2016-01-28 This book discusses the opportunities and challenges facing legal education in the era of globalization It identifies the knowledge and skills that law students will require in order to prepare for the practice of tomorrow and explores pedagogical shifts legal education needs to make inside and outside of the classroom With contributions from leading experts on legal education from various jurisdictions across the globe the work combines theoretical depth with practical insights Seeking to understand the changing landscape of legal education in the era of globalization the contributions find that law schools can and must adopt educational strategies that at least present students with different understandings of what studying and practicing law is meant to be about They find that law schools need to offer their students choices a vision of practice that is not driven entirely by the demands of the marketplace or the needs of major international law firms Bridging the gap between theory and practice this book makes a significant contribution to the impact of globalization on legal education and how students and law schools need to adapt for the future It will be of great interest to academics and students of comparative legal studies and legal education as well as policy makers and practitioners **Graduate Studies** ,1975
