Fanon, Žižek, and the Violence of Resistance Zahi Zalloua, 2025-06-26 In a novel pairing of anti colonial theorist Frantz Fanon with Marxist Lacanian philosopher Slavoj Žižek Zahi Zalloua explores the ways both thinkers expose the violence of political structures This inventive exploration advances an anti racist critique describing how ontology operates in a racial matrix to produce some human bodies that count and others deemed not quite or non human that do not For Fanon and Žižek the violence of ontology must be met with another form of violence a revolutionary violence that delegitimizes the logic of the symbolic order and troubles its collective fantasies Whereas Fanon begins his challenge to ontology by exposing its historical linkages to Europe s destructive imperialist procedures before proceeding to stretch Marxism along with psychoanalysis to account for the crushing neo colonial situation Žižek premises his work on the refusal to accept the totality of ontology Because of these different points of intervention Fanon and Žižek together offer a powerful and multifaceted assessment of the liberal anti racist paradigm whose propensity for identity politics and aversion to class struggle silence the cry of the dispossessed and foreclose radical change Avoiding contemporary separatist temptations decoloniality and Afropessimism and breaking with a non violent sentimentalist futurology that announces more of the same Fanon and Žižek point in a different direction one that eschews identitarian thought in favor of a collective struggle for freedom and equality

Innovate to Dominate Tai Ming Cheung, 2022-08-15 In Innovate to Dominate Tai Ming Cheung offers insight into why how and whether China will overtake the United States to become the world s preeminent technological and security power This

examination of the means and ends of China's quest for techno security supremacy is required reading for anyone looking for clues as to the long term direction of the global order. The techno security domain Cheung argues is where national security innovation and economic development converge and it has become the center of power and prosperity in the twenty first century. China's paramount leader Xi Jinping recognizes that effectively harnessing the complex interactions among security innovation and development is essential in enabling China to compete for global dominance. Cheung offers a richly detailed account of how China is building a potent techno security state. In *Innovate to Dominate* he takes readers from the strategic vision guiding this transformation to the nuts and bolts of policy implementation. The state led top down mobilizational model that China is pursuing has been a winning formula so far but the sternest test is ahead as China begins to compete head to head with the United States and aims to surpass its archrival by mid century if not sooner. *Innovate to Dominate* is a timely and analytically rigorous examination of the key strategies guiding China's transformation of its capabilities in the national technological military and security spheres and how this is taking place. Cheung authoritatively addresses the burning questions being asked in capitals around the world. Can China become the dominant global techno security power? And if so when?

PLATE: Product Lifetimes And The Environment Conny A. Bakker, 2017-11-15. Product lifetimes are critical for the circular economy, resource efficiency, waste reduction and low carbon strategies for sustainability and are therefore of interest to academics from many different disciplines as well as original equipment manufacturers (OEMs) and other stakeholders. The challenges related to product lifetimes must be tackled from multiple perspectives, making the sharing of knowledge and expertise from different disciplines particularly important. This book presents papers from the second Product Lifetime and the Environment (PLATE) conference held in Delft, the Netherlands, in November 2017. The conference originated from the desire to bring together academic researchers working in the field of sustainability to benefit from each other's knowledge and further advance the field. The book includes the 88 full papers delivered at the conference, grouped according to the following 7 conference themes: design for product longevity, product lifetime optimization, cultural perspectives on the throwaway society, circular economy and product lifetimes, business opportunities, economic implications and marketing strategies, consumer influences on product lifetimes and policy regulation and legislation. The book will be of interest to all those concerned with sustainable consumption, circular economy and resource efficiency. **Outdoor Life**, 1963

Injustice Danny Dorling, 2015-06-03. In the five years since the first edition of *Injustice* there have been devastating increases in poverty, hunger and destitution in the UK. Globally, the richest 1% have never held a greater share of world wealth while the share of most of the other 99% has fallen in the last five years, with more and more people in debt, especially the young. Economic inequalities will persist and continue to grow for as long as we tolerate the injustices which underpin them. This fully rewritten and updated edition revisits Dorling's claim that Beveridge's five social evils are being replaced by five new tenets of injustice: elitism, efficient exclusion, necessary prejudice, natural greed and despair.

inevitable By showing these beliefs are unfounded Dorling offers hope of a more equal society We are living in the most remarkable and dangerous times With every year that passes it is more evident that Injustice is essential reading for anyone concerned with social justice and wants to do something about it
