

MODEL 55 STEREO GUIDE

The Stereo Guide is an electronic addition to your 1A0, 1A-120, 771, or 1A-20. It will automatically indicate the presence of a stereo broadcasting station. The unit can be easily added to your tuner or adapter and will be a real convenience to you. If you do not desire to install the Model 55 yourself, our Authorized Service Station listed on the enclosed sheet will do it for you at a nominal fee.

Since your tuner is already aligned and operating accurately, you must be extremely careful not to readjust or change any of the other parts of the tuner when installing the Model 55 or when connecting the wires. This will be particularly true in the case of the 771, as the small holes must be drilled in the chassis. Also note that, should any tubes be removed from their sockets, it is imperative that they be reinserted into their original locations in order to maintain proper alignment.

The only tools necessary for installing the Model 55 are a pair of pliers or a wire nut set screw, a pair of longnose pliers, and a soldering iron or gun. An electric drill and #25 (1/16") bit will be needed for mounting the Model 55 on the 1A0 Tuner. An electric drill plus a 7/16" bit and a 1/2" bit will be needed for mounting the Model 55 on the 1A1 or the 1A21 adapters. A pair of wire cutters may also be helpful. An alignment tool and approximately 10' of nichrome solder are provided. THE ONLY WIRE MUST BE A 22 AWG. Note no circumstances should you use Cold Chisel Solder. All connections are made in Cold Chisel Solder is used.

If you have any difficulty, do not hesitate to write our SERVICE DEPARTMENT for assistance.
