Classifying Cells

Imagine that you are part of a science competition. Your task is to identify cell samples that come from once-living things. You must then classify the cells as coming from producers, consumers, or decomposers. Start by making observations of samples A, B, C, D, E, and F and then decide how to classify each cell sample.

Station 1

Use the card at the station to correctly set up the equipment.

Exhibit 1

Look at samples A and B closely. Use the hand lens alone or the hand lens and the microscope. Draw a sketch of what you observe. Label any of the following structures you see: cell membrane, cell wall, nucleus, cytoplasm, vascular system, and chloroplast. Circle the drawing that represents a once-living organism.

Station 2

Use the card at the station to correctly set up the equipment.

Exhibit 2

Look at samples C and D closely. Use the hand lens alone or the hand lens and the microscope. Draw a sketch of what you observe. Label any of the following structures you see: cell membrane, cell wall, nucleus, cytoplasm, vascular system, and chloroplast. Circle the drawing that represents a once-living organism.
