Leading Schools During Crisis Matthew J. Pepper, Tim D. London, Mike L. Dishman, Jessica L. Lewis, 2010-01-16 School leadership is synonymous with challenge However some school leaders face true crises situations threatening the continuing existence of their school *Leading Schools During Crisis* analyzes leadership and behaviors of principals in these extraordinary circumstances A simultaneously scholarly and practice oriented book *Leading Schools During Crisis* proposes the first school specific model of defining and analyzing crises Through authentic case studies *Leading Schools During Crisis* offers a detailed theoretical and practical analysis of each crisis and the lessons from it for all school leaders Highlights of the twelve case studies include P S 234 Manhattan At nine a m on September 11 2001 the thirty seven teachers and 650 elementary students of P S 234 were twelve hundred feet from Ground Zero Principal Anna Switzer states r ight when the second plane crashed that s when we knew that it wasn t an accident George Washington Carver H S New Orleans Louisiana Principal Vanessa Eugene believed Katrina would be another chapter in New Orleans long history of near miss hurricanes Carver s campus was soon under ten feet of water Sobrante Park E S Oakland California Like many schools Sobrante Park only slowly realized the paradigm shift associated with the No Child Left Behind Act until the fifth year of failing to make Adequate Yearly Progress What do you do when all the data is bad asked Principal Marco Franco Platte Canyon H S Bailey Colorado Principal Brian Krause was approached by a frantic student who reported T here s a guy in the English classroom with a gun I remember thinking okay he said guy He didn t say student or kid or Johnny Other case studies include the challenges inherent in starting charter schools discovery of systemic and deliberate grade fraud rezoning of 95 percent of a elementary school s student population and leading a school populated by changing and often contentious re

The Death and Life of the Great American School System Diane Ravitch, 2010-03-02 Discusses how school choice misapplied standards of accountability the No Child Left Behind mandate and the use of a corporate model have all led to a decline in public education and presents arguments for a return to strong neighborhood schools and quality teaching

Education Reform in the American States Jerry McBeath, Maria Elena Reyes, Mary Ehrlander, 2008-04-01 *Education Reform in the American States* is a timely evaluation of the accountability movement in American public education culminating in the No Child Left Behind Act federal legislation of 2002 The authors treat the current accountability movement placing it in historical context and addressing the evolution in public education policymaking from the overwhelming emphasis on state and local discretion to increasing federal oversight and mandates related to federal funding They provide case studies of the educational accountability movements in nine states and analyze

the factors and forces which explain progress in achievement levels as measured on standardized tests and the states prospects for meeting their NCLB targets The book and the individual case studies acknowledge the merits of NCLB while exposing several significant flaws and unintended harmful consequences of the act particularly its incentives for states to lower their standards in order to meet annual yearly progress targets and its threat to withdraw federal funds from districts with the highest percentage of disadvantaged students The audience for this study includes local state and federal education policy makers administrators and instructors in schools of education and other teaching programs educators and the general public

Charter School Report Card Shawgi Tell,2016-04-01 What is a charter school Where do they come from Who promotes them and why What are they supposed to do Are they the silver bullet to the ills plaguing the American public education system This book provides a comprehensive and accessible overview and analysis of charter schools and their many dimensions It shows that charter schools as a whole lower the quality of education through the privatization and marketization of education The final chapter provides readers with a way toward rethinking and remaking education in a way that is consistent with modern requirements Society and its members need a fully funded high quality public education system open to all and controlled by a public authority

Canaries Reflect on the Mine Jeanne Cameron,2012-12-01 In Canaries Reflect on the Mine Dropouts Stories of Schooling Jeanne Cameron invites the reader to see schooling and early school leaving through the eyes of high school dropouts themselves The transcendent desires revealed by this research to be known and valued to learn with purpose and autonomy are spoken with poignant clarity by the young people who story these pages This study offers a compelling and timely critique of the dominant neoliberal discourse on schooling and early school leaving It challenges conventional wisdom about dropouts and shows how the experiences and needs of those who leave school early and those who persist to graduation are more similar than different Collectively these young people s stories evoke a canary in the mine metaphor one where the canaries exit and the miners remain They implore us to see the dropout crisis as a symptom of the alienating and dehumanizing school practices advanced by No Child Left Behind and Race to the Top More importantly they offer a vision for schooling that lovingly embraces and extends all students experiences enriches their biographies and celebrates and supports each of their talents and purposes with equal passion Pre service and in service teachers educational researchers and policy makers administrators and advocates for equitable and democratic schooling have much to learn from this book Qualitative researchers will find a powerful model for working collaboratively with youth to represent their experiences and to craft solutions to the challenges they face Students of sociology will discover a compelling illustration of C Wright Mills sociological imagination and his charge to take it big by drawing connections between individual biographies and the social and historical structures that frame lived experience For professional social scientists it embodies Mills challenge to embrace the moral sensibilities required to understand and improve the human condition

The Death of "Why?" Andrea Batista Schlesinger,2009-06-26 A look at how Americans are losing their sense of

curiosity and skepticism and how some are working to change that The spirit of inquiry is the engine of democracy The democratic process is nothing less than citizens regularly asking what kind of society they want to live in and whom they want to lead them But more and more people are avoiding the whole messy business of questioning Americans are instead being trained to look for ready made answers with potentially dire implications for the health of our society In this impassioned new book Andrea Batista Schlesinger argues that we re besieged by cultural forces that urge us to avoid independent thought and critical analysis The media reduces politics to a spectator sport focusing on polls and personalities rather than issues and ideas Schools teach to standardized tests students learn to fill in the bubbles not open their minds Financial literacy courses have replaced civics classes graduating smart shoppers rather than informed citizens Even the Internet promotes habits that discourage inquiry Regurgitating search engine results becomes a substitute for genuine research and reflection Social networks promote connection rather than engagement With all the information available online over a third of those younger than twenty five say they get no news on a typical day up from twenty five percent in 1998 The situation isn t hopeless Batista Schlesinger spotlights individuals and institutions across the country that are working to renew a healthy sense of curiosity and skepticism particularly in American s youth It is at this point an uphill battle but one well worth undertaking The Death of Why offers both a penetrating socio cultural critique of our current path and a way forward for cultivating inquiry and reinvigorating our democracy From her start in politics as a teenager Andrea Batista Schlesinger has asked the important questions Now she asks her most important are we teaching young people to value inquiry and if not what hope can we have for the future of democracy Katrina vanden Heuvel Publisher The Nation The Death of Why makes the case that we cannot create social change without a culture of questioning We should pay close attention to this brilliant contribution Deepak Bhargava executive director Center for Community Change She asks the right questions at a time when we seem more eager for answers that we don t understand or care about Deborah Meier Senior Scholar New York University author of In Schools We Trust and The Power of Their Ideas and founder of innovative New York and Boston area public schools [Native Cultural Competency in Mainstream Schooling](#) Sharon Vegh Williams, Joni M. Cole, 2017-10-17 This book provides an in depth analysis of Native American educational issues in the Northeast and highlights teacher training and instruction that address the experience and needs of the many Native students that attend reservation border town schools Williams and Cole expand upon the results of a participatory action study that explored the barriers to success for Native American students in mainstream schooling during the process of creating and implementing a Native cultural competency teacher training program for classroom teachers They document the evolution of cross cultural relationships and interactions in a diverse schooling context and aim to usher in concrete changes in school experiences and educational outcomes for Native American students by fostering non Native teachers growth in cultural competency *Stop High-stakes Testing* Dale D. Johnson, 2008 The objectives of corrective justice are affordable housing with reliable running

water and electricity employment for parents and guardians to make a living wage top notch tutors for all children who need them equity in school buildings personnel and resources adequate medical and dental care for all students and violence free communities and home lives These objectives are appropriate in a nation where children recite the words with liberty and justice for all at the start of each school day The authors argue that until corrective justice has been established high stakes testing in public schools must be discontinued

Childhoods Gaile Sloan Cannella,Lourdes Diaz Soto,2010 For the past 20 years a range of scholars educators and cultural workers have examined dominant discourses of childhood using critical feminist and other postmodern perspectives Located in a variety of disciplines these poststructural deconstructive and even postcolonial critiques have challenged everything from notions of the universal child to adult child dualisms to deterministic developmental theory The purpose of this volume is to acknowledge the profound contributions of that large body of literature while demonstrating the ways that critical analyses can be used to generate avenues actions that increase possibilities for social justice for those who are younger while at the same time avoiding determinism In this time of globalization hyper capitalism and discourses that would control and disqualify through constructions like accountability we believe that projects such as this are of utmost importance The volume is divided into four major sections to reflect the multiplicity of human voices and perspectives section I contemporary circumstances and dominant discourses within which we all attempt to function sections II and III and the generation of new possibilities for constructing relationships together

section IV Finally a voice from the heart within a reconceptualist social science agenda for early childhood studies is presented
