Swansea and Nantgarw Porcelains Howell G.M. Edwards, 2017-03-27. This book describes a holistic study of the porcelain manufactured at Nantgarw and Swansea in the first quarter of the 19th Century using both scientific analytical data and historical provenancing. This porcelain is acclaimed as some of the finest and most translucent porcelain ever produced. These two porcelain factories are linked through the artistic and creative activities of the enigmatic William Billingsley and had a strictly limited production over only three or four years during the period 1812-1820. The earliest chemical analysis of these porcelains were undertaken almost 100 years ago and are compared with the results of more recent analyses. The chemical composition of these porcelains, their artistic decoration, and the struggle to maintain quality production is reviewed. Scientific explanations are proposed for the characteristic Swansea duck egg porcelain translucency and for the Nantgarw iridescence. The book is well illustrated throughout and affords a good basis for the further in-depth study of Swansea and Nantgarw porcelains.

Ceramic Technology for Potters and Sculptors Yvonne Hutchinson Cuff, 1996. Demonstrates the technology involved in making and firing ceramics.

Nantgarw and Swansea Porcelains Howell G.M. Edwards, 2018-04-30. This book gives a detailed account of the holistic research carried out on the analytical data obtained historically on the products of the Nantgarw and Swansea porcelain manufactories which existed for a few years only during the second decade of the 19th Century. A background to the establishment of the two factories which are linked through the persons of the enigmatic William Billingsley and his kiln manager Samuel Walker involves the sourcing of their raw materials and problems associated with the manufacture and distribution of the finished products. A description of the minerals and additives used in porcelain production is recounted to set the scene for the critical evaluation of the comprehensive analytical data which have been published on Nantgarw and Swansea porcelains. For the first time, the author has adopted a nondestructive technique, Raman spectroscopy, to interrogate perfect samples of Nantgarw and Swansea porcelain as well as a selection of shards from an archaeological excavation carried out at a waste dump at the Nantgarw China Works site. Following these experiments, several questions relating to the porcelain bodies of Swansea and Nantgarw

china can be answered and a protocol established for the preliminary evaluation of items of suspect attribution to confirm or not the correctness of their assignment to these Welsh porcelain factories Wild Clay Matt Levy, Takuro Shibata, Hitomi Shibata, 2022-10-27 The ultimate illustrated guide for sourcing processing and using wild clay Potters around the world are taking to the local landscape to dig their own wild clay discover its unique properties and apply it to their craft This guide is the ideal starting point for anyone from novices improvers and experts to educators and students who wants to forge a closer bond between their art and their surroundings Testing and trial and error are key to finding a material s best use so the authors tips drawn from long experience in the US and Japan but which can be applied to clays anywhere provide an enviable head start on this rewarding journey A clay might be best suited to sculpture and tile bodies throwing clay bodies handbuilding and slab bodies or simply be applied as a glaze or slip The specific properties of found materials can create a diverse range of effects and surfaces or even when not fired can be adapted for use as colorful pastels or pigments Beautiful illustrations and helpful technical descriptions explain the formation of various clays how to locate collect and assess them how to test their properties of shrinkage water absorption texture and plasticity the best ways to test fire them and how to adapt a clay s characteristics by blending appropriate materials From prospecting in the field to holding your finished product there is helpful advice through every stage and a gallery of work by international potters who have embraced the clays found around them **The British Clayworker** ,1911 **Ceramic, Art and Civilisation** Paul Greenhalgh, 2020-12-24 Full of surprises and evocative The Spectator Passionately written Apollo An extraordinary accomplishment Edmund de Waal Monumental Times Literary Supplement An epic reshaping of ceramic art Crafts An important book The Arts Society Magazine In his major new history Paul Greenhalgh tells the story of ceramics as a story of human civilisation from the Ancient Greeks to the present day As a core craft technology pottery has underpinned domesticity business religion recreation architecture and art for millennia Indeed the history of ceramics parallels the development of human society This fascinating and very human history traces the story of ceramic art and industry from the Ancient Greeks to the Romans and the medieval world Islamic ceramic cultures and their influence on the Italian Renaissance Chinese and European porcelain production modernity and Art Nouveau the rise of the studio potter Art Deco International Style and Mid Century Modern and finally the contemporary explosion of ceramic making and the postmodern potter Interwoven in this journey through time and place is the story of the pots themselves the culture of the ceramics and their character and meaning Ceramics have had a presence in virtually every country and historical period and have worked as a commodity servicing every social class They are omnipresent a ubiquitous art Ceramic culture is a clear unique definable thing and has an internal logic that holds it together through millennia Hence ceramics is the most peculiar and extraordinary of all the arts At once cheap expensive elite plebeian high tech low tech exotic eccentric comic tragic spiritual and secular it has revealed itself to be as fluid as the mud it is made from Ceramics are the very stuff of how civilized life was
