healthcare has observed a continuous increase in digitalization of its systems and services. As a result, traditional methods of recording patient-provided information have become increasingly cost inefficient and unreliable. In response to these changes, the development of Electronic Patient Reported Outcome (ePRO) has become a priority for care providers. Electronic Patient Reported Outcome can include patient-provided information about symptoms, side effects, drug timing, and other questions recorded on an electronic device. ePRO tools have the potential to improve communication between patients and healthcare providers, enable patient-centered care, and enhance access to information. Moreover, ePRO solutions make patient care more predictive, proactive, personalized, and preventative by empowering patient self-reporting and monitoring. Indeed, ePRO is contributing to better care outcomes and improved productivity and efficiency of care delivery.

Leadership Results Sebastian Salicru, 2017-08-14. A model for developing the leaders and delivering the leadership results the world needs. Leadership Results explores the fall of traditional leadership thinking and the struggling multibillion dollar leadership development industry that is failing to deliver results and explains the mindset, skills, ways of being, and methods that will get results in the new context and evolving paradigm. The Leadership Results model is practical and predictive, providing a way forward for companies seeking to build sustainable leadership capacity, develop individual leaders, boost employee engagement, and deliver breakthrough results through shared and collective leadership. Actionable steps guide you through the process of evolving leadership culture to see increased productivity, growth opportunities, and ensured profitability borne on a culture of trust, collaboration, fairness, and a commitment to innovation and real prosperity. Expert analysis debunks pervasive myths and assumptions surrounding leadership, employee engagement, and talent development while demystifying the role technology plays in innovation and progress. Leaders, coaches, trainers, OD practitioners, change agents, and students will find insightful guidance, thought-provoking discussion, and illustrative case studies that will help them rethink leadership to make a stronger impact. Take bold action to change the status quo. Marry strategic and innovation leadership into a force for real change. Stop making the same mistakes and start forging a new path forward. From the heads of state on down, all levels of leadership are experiencing a rapid loss of trust and confidence, and the glaring absence of results that follows. Unethical business practices are costing more than five per cent of the global GDP every year. Citizens around the world have lost faith in the public and private sectors; only 13% of employees are engaged at work. Clearly, there is a severe lack of effective leadership. Leadership Results provides a practical way forward through this global quagmire with a clear, actionable model for leadership that works.
