My Future Career Goals

A career is an important occupation in someone's life. It has to be something you love, because your not doing it just for a reward. At this stage in life, it should be thought about what career you would want to pursue because you would want to pick the career and then achieve the goals you have to make to acquire it. The career I decided to research that interests me is being a Registered Nurse or "Rn". I'm interested in this career because I feel like I'm a compassionate person that would easily suit this job and I always wanted to work in the medical field. A Registered Nurse is a nurse who has moved on from a nursing program and met the necessities laid out by a nation, state, are or comparable permitting body to acquire a nursing license. This Research paper will further explain how I have come to this decision.

For starters, the education required for this career is to have at least a 2 year degree in Bachelors and College level training. Other requirements for this career would be things such as: compassion, proper education, and confidence. The entry level salary ranges from \$66,610-\$70,000. The Mid level salary ranges from \$75,285-\$89,321. Lastly, the senior level salary ranges from 90,000- \$100,000. Advancement opportunities for Mid Level include having an advancement in position and salary. The years of experience for this would be around 8 years. Advancement opportunities for Senior Level is being in a higher position along with higher salary. This all will most likely take up over 15 years of experience. The jobs located for this career are located everywhere in the U.S.

Day to day responsibilities and tasks would be to preform diagnostic tests and analyzing results, operating machinery, and recording patients symptoms/ medical records. Some extra responsibilities I might encounter for this career is to educate animals and other individuals about many medical conditions and to also give emotional support and tips to families along with their patients. You would need a diploma and an associates/bachelors degree in science of nursing. An individual could go to a High School that has a nursing program as a class for students to take to get experience of this career. Also, Western Carolina University, Cambridge Health, Southwestern College, Keiser University and etc.

The Majority of these jobs are located in: California, Texas, Florida, New York, Ohio, Illinois, and New Jersey. Also, registered nurses are in high demand everywhere.

This map shows how registered nurses are in hinge demand all across the U.S. For a registered nurse to afford living in a city in Florida on a starting salary would be quite rough because it would be hard for them to use that plus their daily expenses. But you will end up getting through with it. Some of the benefits from this career would be to help benefit patients from some of there current conditions and the career flexibility. Nurses can enjoy their grown rate b

How to Create the Future You Desire Christian Whitlowe, This short essay is divided into four parts Part I talks about the fluid and malleable nature of the future presenting it not as a fixed destination but as a field of possibilities that is shaped by inner beliefs and desires It suggests that the future is sensitive to daily choices and the vision we cultivate functioning like a river with multiple courses to follow In order to influence it it is essential to change one s inner perception visualize one s goals as already accomplished and trust in what is not yet seen allowing imagination and feeling to chart the path of what is to come Part II focuses on the power of the mind and imagination as instruments capable of transforming reality It proposes that the external world can be reshaped by changing the internal focus going beyond the appearances captured by the senses For a wish to come true it s not enough to imagine it superficially you have to feel it as present and persist in that state with conviction Training concentration on a specific scene that represents the goal already achieved is highlighted as an essential practice creating a direct connection between now and the desired future Part III examines the idea that truth lies beyond what the senses show freeing those who understand it from apparent limitations It states that the imagination is a powerful creative force capable of transforming the impossible into the real as long as it is guided by thoughts of beauty and goodness The text warns that this force responds to both the positive and the negative requiring care in what is cultivated internally In this way reality reflects what we carry in our consciousness and whoever masters this principle becomes the artisan of their own destiny Part IV concludes that the realization of any ideal is born within and that the external world is a mirror of the internal state Everything that is sought already exists in potential waiting to be awakened by consciousness Getting in tune with a high ideal and cultivating positive emotions is presented as the means of attracting harmonious circumstances The text emphasizes that the creation of a new reality does not come from external efforts but from the transformation of consciousness which reorganizes reality dissolving the old and shaping the new It is our hope that this short essay will shed light on the transformative potential that resides in everyone showing how the future bends to the choices and visions cultivated in the present Tags self awareness power of the mind I am creative imagination law of attraction inner transformation creative mind manifestation creative visualization personal fulfillment spiritual development inner growth power of thought co creation of reality awakening of consciousness practical spirituality success prosperity wealth money

We Need More Tables Norma Young, 2020-05-04 Poverty isn't always a jumble of appalling statistics. Sometimes there are names, faces, and stories to the numbers. It's a cousin who's finished high school but doesn't have enough money to job hunt. It's a colleague whose hand-to-mouth living still only gets her through half the month because her salary is just not enough. It's a grandfather who worked for decades and got a retirement package so paltry he can't pay his monthly bills. When people you know and love are behind the data of impoverishment, it can be hard to determine how to help. It can be even harder to settle on how much to help without compromising on your own quality of life. In *We Need More Tables*, Norma Young provides guidance on how to find a balance between alleviating poverty and yet maintaining a measure of the privilege one may have been born with. By exploring assumptions such as the myth of hard work and the fallacy of meritocracy, as well as historical methodologies of philanthropy in Africa and suggesting the practice of impactful altruism such as paying a living wage, building a solidarity economy, or choosing regenerative investing, she shares an outline of how those with privilege can play a role in social justice. Drawing on indigenous knowledge, fables, proverbs, and learnings from African academics, *We Need More Tables* presents a framework of what is required to bring more of our communities to participate at the tables where decisions are made. Norma Young's insightful book provides us with realistic and practical ways of moving towards eradicating poverty in South Africa.
