Samsung Notebook 9: Learning the Basics Bill Stonehem, 2016-06-22 Since its inception in early 1938 Samsung Inc has managed to solidify its edge in the area of electronics and technology Among the latest piece of technology being introduced to the market by Samsung Inc is the new Samsung Notebook 9 laptop Since its launch to the public in early 2016 the Notebook 9 has been lauded for its modern design enhanced device performance and attention to convenience *Moody's International Manual*, 1996 **Ageing with Smartphones in Ireland** Pauline Garvey, Daniel Miller, 2021-05-06 There are

not many books about how people get younger It doesn't happen very often But *Ageing with Smartphones in Ireland* documents a radical change in the experience of ageing Based on two ethnographies one within Dublin and the other from the Dublin region the book shows that people rather than seeing themselves as old focus on crafting a new life in retirement Our research participants apply new ideals of sustainability both to themselves and to their environment They go for long walks play bridge do yoga and keep as healthy as possible As part of Ireland's mainstream middle class they may have more time than the young to embrace green ideals and more money to move to energy efficient homes throw out household detritus and protect their environment The smartphone has become integral to this new trajectory For some it is an intimidating burden linked to being on the wrong side of a new digital divide But for most however it has brought back the extended family and old friends and helped resolve intergenerational conflicts though facilitating new forms of grandparenting It has also become central to health issues whether by Googling information or looking after frail parents The smartphone enables this sense of getting younger as people download the music of their youth and develop new interests This is a book about acknowledging late middle age in contemporary Ireland How do older people in Ireland experience life today Praise for *Ageing with Smartphones in Ireland* An innovative and thorough description and analysis of how one small piece of technology has changed the way Irish people live their lives Tom Inglis Professor Emeritus of Sociology in University College Dublin
