Set up your scanner in one of two ways: either install the software first or connect the scanner first. It is recommended that you install the software first, especially on a Macintosh computer.

If you experience difficulty installing your scanner, see installation problems - hp scanjet 2300c or 3500c series on page 11.

### install the software first (Windows and Macintosh)

- 1 Close all open programs on your computer.
- 2 Locate the HP Photo & Imaging software CD-ROM that is appropriate for your language and operating system and insert it into your computer.
- 3 For a Microsoft Windows computer: Follow the instructions on the screen. Or, if the installation program does not start automatically:
  - a. On the **Start** menu, click **Run**.
  - b. Type: `x:\setup.exe` (where x is the letter of the CD-ROM drive).
 For a Macintosh computer (HP Scanjet 3500c series only): Double-click the **Installation Read Me** file on the CD-ROM and follow the instructions.
- 4 If the instructions prompt you to shut down your computer, do so.
- 5 Connect the USB cable between the USB port on the scanner and the USB port on the computer.
- 6 Connect the power cable between the scanner and a surge protector or a grounded wall outlet that is easy to reach. This turns on the scanner.
- 7 If necessary, turn your computer on again.

### connect the scanner first (Windows only)

- 1 Make sure that your computer is on and that the operating system is running.
- 2 Connect the USB cable between the USB port on the scanner and the USB port on the computer.
