Manipulation Christian Coons,Michael Weber,2014-07-01 In all groups from couples to nation states people influence one another Much of this influence is benign for example giving advice to friends or serving as role models for our children and students Some forms of influence however are clearly morally suspect such as threats of violence and blackmail A great deal

of attention has been paid to one form of morally suspect influence namely coercion Less attention has been paid to what might be a more pervasive form of influence manipulation The essays in this volume address this relative imbalance by focusing on manipulation examining its nature moral status and its significance in personal and social life They address a number of central questions What counts as manipulation How is it distinguished from coercion and ordinary rational persuasion Is it always wrong or can it sometimes be justified and if so when Is manipulative influence more benign than coercion Can one manipulate unintentionally How does being manipulated to act bear on one's moral responsibility for so acting Given various answers to these questions what should we think of practices such as advertising and seduction
