makers wanting a systematic and thorough analysis of the potential and limitations of the various approaches to assess research and research performance *Global University Rankings* T. Erkkilä, 2013-09-26 *Global University Rankings* explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe **International Conference on Digital Libraries (ICDL) 2016** Shantanu Ganguly, P K Bhattacharya, Projes Roy, Pallavi Shukla, N Deepa, 2016-12-14 The ICDL Conferences are recognized as one of the most important platforms in the world where noted experts share their experiences Many DL experts have contributed thought provoking papers in ICDL 2016 These important papers are reviewed and conceptualized into ICDL on different areas of DL proceedings The Proceedings have two volumes and over 700 pages Collection Evaluation in Academic Libraries Karen C. Kohn, 2015-06-24 Librarians have long used data to describe their collections Traditional measures have simply been inputs and outputs volumes acquired processed owned or circulated With the growth since the 1990s of cultures of assessment librarians have sought statistics that are evaluative rather than simply descriptive More recently exponentially increasing journal prices and an economic recession have intensified the need to make careful purchasing decisions and to justify these to administrators A methodical evaluation of a library collection can help librarians understand and meet user needs and can help communicate to administrators that the library is a good use of the institution's money *Collection Evaluation in Academic Libraries A Practical Guide for Librarians* equips collections managers to select and implement a method or several methods of evaluating their library collections It includes sections on four tools for evaluation Comparison to peer institutions Core lists Usage statistics from circulation and ILL Citation analysis Chapters on each of these approaches present the advantages and disadvantages of each method instructions on data collection and analysis with screenshots and suggested action steps after completing the analysis With a unique combination of step by step instructions and discussions of the purpose and role of data this book provides an unusually thorough guide to collection evaluation It will be indispensable for collection development librarians and anyone looking to strengthen the culture of assessment within the library **Universities under Neoliberalism** Mats Benner, Mikael Holmqvist, 2023-04-05 The COVID 19 pandemic the surge of populism the climate crisis and many other destabilizing factors in our time all point at the expectation of trustworthy knowledge and reliable organization devoted to

knowledge production and dissemination However universities remain enmeshed in economic liberalization and ensuing cultural struggles where their funding governance and practices reflect market imprints even academic ideals such as originality or social ideals such as relevance have been transformed into measurable units and thereby risk losing their historical sway This predicament is the focus of this book The book explores the rise of neo liberalization in academic system in a highly unlikely place Sweden a country with a strong social democratic tradition and a long history of state regulation of higher education As an advanced welfare state with a powerful labour movement and a large public sector market ideals and practices have been carefully curtailed historically This notwithstanding a neoliberal university model has evolved there reshaping notions of academic identities institutional directions and notions of quality This edited collection will be of value to researchers academics and students with an interest in organizational studies governance management higher education sociology and politics

Librarian's Guide to Online Searching Christopher C. Brown, 2021-06-18 Updates the premier textbook for students and librarians needing to know the landscape of current databases and how to search them Librarians need to know of existing databases and they must be able to teach search capabilities and strategies to library users This practical guide introduces librarians to a broad spectrum of fee based and freely available databases and explains how to teach them

The updated 6th edition of this well regarded text covers new databases on the market as well as updates to older databases. It also explains underlying information structures and demonstrates how to search most effectively. It introduces readers to several recent changes such as the move away from metadata based indexing to full text indexing by vendors covering newspaper content. Business databases receive greater emphasis. As in the previous editions, this book takes a real world approach covering topics from basic and advanced search tools to online subject databases. Each chapter includes a thorough discussion, a recap, concrete examples, exercises, and points to consider, making it an ideal text for courses in database searching as well as a trustworthy professional resource. Eugene Garfield 1925-2017 Antonella De Robbio, Raman Nair R, 2017-04-01. Garfield's greatest contribution to science was the Science Citation Index (SCI). It is a system that used to chart connections between pieces of scientific literature. It is not only an intellectual achievement but also an information engineering marvel covering millions of records from numerous subject fields and communicated over worldwide networks. These databases became the foundation of the online research tool called the Web of Knowledge. And it has now become accessible electronically via the Web of Science. Garfield enabled information retrieval to scale up, basically creating the entire information science field as we know it today. His life and work will surely inspire generations of scientists in advancing the frontiers of human knowledge. This is Informatics Studies 4.2, which is the Eugene Garfield Memorial Issue. It gives a bird's eye view of Garfield's life and work and consists of an 80 page interview of Garfield published in print for the first time, presenting his views on the impact of information systems in scientific research, NGOs, the future of Open Access, current research, and Big science, which can guide academic administrators, science policy makers in governments, and scientists.
