Edward Alden, Rebecca Strauss

Scope For Grade 12 Life Science November 2014:

Educational Response, Inclusion and Empowerment for SDGs in Emerging Economies Mustafa Öztürk, 2022-08-22 This volume analyzes cases from emerging economies in relation to the global endeavor to promote the vision of sustainable development in all forms of education. It aims to discuss the significance of hearing local voices and understanding local discourse regarding strategies for action for change and the role of educational systems as a means to communicate, promote and educate for the Sustainable Development Goals (SDGs). In this book, emerging economies are defined as newly industrialized countries that have not yet reached developed status but have in a macro economic sense outpaced their developing counterparts. In this context, the book highlights how education in emerging economies could extend conventional economic methods to sustainability issues or depart from money based calculations and business dominated values to promotion of real life considerations and ethical, environmental and humanistic values. With the help of this volume, readers will have a chance to look at educational response, inclusion and empowerment for SDGs in countries with emerging economies and to grasp the synthesis of Education for Sustainable Development, Global Citizenship Education (ESD), GCE within the overall national educational systems. This volume focuses on early childhood through upper secondary education.

Innovate to Dominate Tai Ming Cheung, 2022-08-15 In *Innovate to Dominate*, Tai Ming Cheung offers insight into why, how and whether China will overtake the United States to become the world's preeminent technological and security power. This examination of the means and ends of China's quest for techno security supremacy is required reading for anyone looking for clues as to the long term direction of the global order. The techno security domain, Cheung argues, is where national security, innovation and economic development converge and it has become the center of power and prosperity in the twenty first century. China's paramount leader, Xi Jinping, recognizes that effectively harnessing the complex interactions among security, innovation and development is essential in enabling China to compete for global dominance. Cheung offers a richly detailed account of how China is building a potent techno security state. In *Innovate to Dominate*, he takes readers from the strategic vision guiding this transformation to the nuts and bolts of policy implementation. The state led top down mobilizational model that China is pursuing has been a winning formula so far, but the sternest test is ahead as China begins to compete head to head with the United States and aims to surpass its archrival by mid century, if not sooner. *Innovate to Dominate* is a timely and analytically rigorous examination of the key strategies guiding China's transformation of its capabilities in the national technological, military and security spheres and how this is taking place. Cheung authoritatively addresses the burning questions being asked in capitals around the world: Can China become the dominant global techno security power? And if so, when?

Science Blogging Christie Wilcox, Bethany Brookshire, Jason G. Goldman, 2016-01-01 Here is the essential how to guide for communicating scientific research and discoveries online, ideal for journalists, researchers and public information officers looking to reach a wide lay audience.
