major universities has responded to the formidable challenges offered by the twentieth century Because Oxford's response has not taken a revolutionary or dramatic form outside observers have not always appreciated the scale of its transformation Here full attention is given to the forces for change the rapid growth in provision for the natural and social sciences the advance of professionalism in scholarship sport and cultural achievement the diffusion of international influences through Rhodes scholars two world wars and the University's mounting research priorities the growing impact of government and of public funding the steady advance of women and the impact made by Oxford's broadened criteria for undergraduate admission The volume also provides valuable background material for the discussion of educational policy In short it presents the reader with a rich cornucopia of insight into many aspects of British life Religion and Society in

Twentieth-Century Britain Callum G. Brown, 2014-09-11 During the twentieth century Britain turned from one of the most deeply religious nations of the world into one of the most secularised nations This book provides a comprehensive account of religion in British society and culture between 1900 and 2000 It traces how Christian Puritanism and respectability framed the people amidst world wars economic depressions and social protest and how until the 1950s religious revivals fostered mass enthusiasm It then examines the sudden and dramatic changes seen in the 1960s and the appearance of religious militancy in the 1980s and 1990s With a focus on the themes of faith cultures secularisation religious militancy and the spiritual revolution of the New Age this book uses people's own experiences and the stories of the churches to display the diversity and richness of British religion Suitable for undergraduate students studying modern British history church history and sociology of religion **Christian Modernities in Britain and Ireland in the Twentieth Century** John Carter

Wood, 2022-12-30 The dramatic social cultural and political changes in the twentieth century posed challenges and opportunities to Christian believers in Britain and Ireland many whether in the churches or among the laity sought to adapt their faith to what was seen as a new modern world fundamentally different than the one in which Christianity had risen to a position of institutional and cultural dominance Alongside the more long term processes of industrialisation urbanisation and democratisation the formative experiences of war and post war reconstruction confrontations with totalitarianism changing relations between the sexes and engagements with an increasingly assertive secular culture inspired many Christians not only to reconsider their faith but also to try to influence the emerging modernity The chapters in this volume address various specific topics from mass politics to sexuality but are linked by a stress on how Christians played active roles in building modern life in twentieth century Britain and Ireland Tensions and ambiguities between religious and secular and between modern and traditional make understanding Christian encounters with modernity a valuable topic in the exploration of the complexities of twentieth century cultural and intellectual history This book will be of great value to students and scholars in the fields of history including modern British history religion and the intersectionality of gender and religion The chapters in this book were originally published as a special issue of Contemporary British History *Culture and the Nonconformist*

Tradition Alan Kreider, Jane Shaw, 1999 Christianity has from its very beginnings and because of its beliefs and practices had a paradoxical relationship to the world This book which contains articles by seven leading historians argues that the relationship between the Nonconformist tradition in Britain and culture provides a particularly illuminating example of this paradox Nonconformists set apart from the Established Church developed their own particular cultural practices and in so doing made a distinctive contribution to the culture of Britain as a whole At the same time they were inevitably influenced by that wider culture These essays consider the development of chapel and Dissenting culture within the wider society examining such issues as the emergence of the Nonconformist conscience the place of politics in the pulpit the contribution of women writers to provincial Nonconformity and the architecture of the free churches This collection of essays goes beyond the usual boundaries of denominational and ecclesiastical history and interacts with broader trends in cultural and social history to demonstrate the significance of such matters as gender relations politics and economics in any exploration of the relationship between Christianity and the world From publisher s description
