# Physical Science June 2memo Paper 2

**Mildred Benton**

## Physical Science June 2memo Paper 2:

**ESSA Science and Engineering, July 31, 1965 to June 30, 1967** United States. Environmental Science Services Administration, 1968 *Rearming for the Cold War, 1945-1960* Elliott Vanveltner Converse, 2012 Book Description The first publication in a multivolume series on the history of the acquisition of major weapon systems by the Department of Defense author Elliott Converse presents a meticulously researched overview of changes in acquisition policies organizations and processes within the United States military establishment during the decade and a half following World War II Many of the changes that shaped the nature and course of weapons research and development production and contracting through the end of the century were instituted between 1945 and 1960 many of the problems that have repeatedly challenged defense policymakers and acquisition professionals also first surfaced during these years This study is the first to combine the histories of the Office of the Secretary of Defense OSD and the military services into one account The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods

*ESSA Science and Engineering, July 13, 1965 to June 30, 1967* United States. Environmental Science Services Administration, 1968 Final Report United States. Advisory Committee on Weather Control, 1958 *History of Acquisition in the Department of Defense, Volume 1* Elliott V. Converse, 2012-06-12 This volume is a history of the acquisition of major weapon systems by the United States armed forces from 1945 to 1960 the decade and a half that spanned the Truman and Eisenhower administrations following World War II These instruments of warfare aircraft armored vehicles artillery guided missiles naval vessels and supporting electronic systems when combined with nuclear warheads gave the postwar American military unprecedented deterrent and striking power 1 They were also enormously expensive The volume is organized chronologically with individual chapters addressing the roles of OSD the Army Navy and Air Force in two distinct periods The first roughly coinciding with President Truman's tenure covers the years from the end of World War II through the end of the Korean War in 1953 The second spans the two terms of the Eisenhower presidency from 1953 through early 1961 The year 1953 marked a natural breakpoint between the two periods The Korean War had ended President Eisenhower and his defense team began implementing the New Look a policy and strategy based on nuclear weapons which they believed would provide security and make it possible to reduce military spending The New Look's stress on nuclear weapons along with the deployment of the first operational guided missiles and the rapid advances subsequently made in nuclear and missile technology profoundly influenced acquisition in the services throughout the 1950s and the remainder of the century As used in this study the term acquisition encompasses the activities by which the United States obtains weapons and other equipment In surveying the history of acquisition between 1945 and 1960 this study discusses or refers in passing to many of the hundreds of weapon system programs initiated by the services in that period but it is not a weapons encyclopedia Instead it investigates a few major programs in depth in the belief that such detailed examination best reveals the evolution of

acquisition policies organizations and processes and the various forces influencing weapons programs Final Report of the Advisory Committee on Weather Control United States. Advisory Committee on Weather Control, 1958 **Resources in Education** ,1988-11 **Federal Register** ,1980-12-15 **On Mars** Edward Clinton Ezell,Linda Neuman Ezell,1984 *Nuclear Science Abstracts* ,1976 *Purdue's Female Founders* Angie Klink,2025-10-01 Purdue's Female Founders The Untold History of Trailblazing Women Faculty chronicles and celebrates the fortitude and achievements of the foremothers of Purdue University This engaging book offers a collection of profiles of women faculty who despite profound roadblocks because of their gender shaped the institution from its beginning in the late 1800s through the latter half of the twentieth century These are the stories of Purdue women who persevered against the odds to follow their dreams to conduct research and teach establish departments schools and colleges and blaze paths in a male dominated culture Readers will learn about women who faced discrimination but persisted and thrived despite prejudice These compelling profiles celebrate women in art science nutrition literature nursing speech engineering fashion design home economics family life psychology agriculture health and kinesiology business and more Covering 125 years of university history told through the female lens this book rightfully honors the many women who helped shape Purdue **Giant Telescopes** W. Patrick McCray,2006-04-30 Every night astronomers use a new generation of giant telescopes at observatories around the world to study phenomena at the forefront of science By focusing on the history of the Gemini Observatory twin 8 meter telescopes located on mountain peaks in Hawaii and Chile Giant Telescopes tells the story behind the planning and construction of modern scientific tools offering a detailed view of the technological and political transformation of astronomy in the postwar era Drawing on interviews with participants and archival documents W Patrick McCray describes the ambitions and machinations of prominent astronomers engineers funding patrons and politicians in their effort to construct a modern facility for cutting edge science and to establish a model for international cooperation in the coming era of megascience His account details the technological institutional cultural and financial challenges that scientists faced while planning and building a new generation of giant telescopes Besides exploring how and why scientists embraced the promise and potential of new technologies he considers how these new tools affected what it means to be an astronomer McCray's book should interest anyone who desires a deeper understanding of the science technology and politics behind finding our place in the universe **On Mars** Edward Clinton Ezell,Linda Neuman Ezell,2013-02-19 Although it was only designed for a ninety day surface mission the Viking 1 lander ultimately transmitted science messages to Earth for seven years This authoritative history chronicles the remarkable achievements of the Viking program during its first three decades Commissioned by NASA it recounts the events surrounding the first planetary landing on Earth's closest neighbor and the first on site search for evidence of extraterrestrial life It also portrays a human drama in which thousands of professionals from government industry and academia joined together to accomplish the seemingly impossible This history begins with a survey of the qualities that make the surface and atmosphere

of Mars prime targets for scientific investigation A retrospective of NASA s Mariner program follows detailing the series of robotic interplanetary probes that led to the initiation of the Viking program in 1968 The authors trace the ensuing technological developments including the first lander vehicles and orbiter They also profile the cooperation of managerial technical and scientific teams during the mission s data gathering and analysis phases The final chapters outline the scientific results of the Viking investigations examine some of the unresolved questions and consider possible future explorations Dozens of photos taken by Viking cameras illuminate the text

Freedom's Laboratory Audra J. Wolfe, 2020-08-04

The Cold War ended long ago but the language of science and freedom continues to shape public debates over the relationship between science and politics in the United States Scientists like to proclaim that science knows no borders Scientific researchers follow the evidence where it leads their conclusions free of prejudice or ideology But is that really the case In *Freedom's Laboratory* Audra J Wolfe shows how these ideas were tested to their limits in the high stakes propaganda battles of the Cold War Wolfe examines the role that scientists in concert with administrators and policymakers played in American cultural diplomacy after World War II During this period the engines of US propaganda promoted a vision of science that highlighted empiricism objectivity a commitment to pure research and internationalism Working both overtly and covertly wittingly and unwittingly with governmental and private organizations scientists attempted to decide what exactly they meant when they referred to scientific freedom or the US ideology More frequently however they defined American science merely as the opposite of Communist science Uncovering many startling episodes of the close relationship between the US government and private scientific groups *Freedom's Laboratory* is the first work to explore science s link to US propaganda and psychological warfare campaigns during the Cold War Closing in the present day with a discussion of the 2017 March for Science and the prospects for science and science diplomacy in the Trump era the book demonstrates the continued hold of Cold War thinking on ideas about science and politics in the United States

**Title Announcement Bulletin**, 1957

**Cold War, Hot Science** Robert Bud, Philip Gummett, Science Museum (Great Britain), 1999 Cold War Hot Science presents an authoritative history of post war British defence research as related to the establishments that now form part of the Defence Evaluation and Research Agency DERA The agency includes such well known centres as the Royal Aircraft Establishment at Farnborough the Royal Signals and Radar Establishment at Malvern and the Chemical and Biological Defence Establishment at Porton Down Collectively these have carried out a very high proportion of all the scientific research conducted in Britain since the war Study of these vast but traditionally secretive institutions is vital to understanding science in post war Britain
