**Future Spacecraft Propulsion Systems and Integration** Paul A. Czysz,Claudio Bruno,Bernd Chudoba,2017-08-30 The updated and expanded third edition of this book focuses on the multi disciplinary coupling between flight vehicle hardware alternatives and enabling propulsion systems It discusses how to match near term and far term aerospace vehicles to missions and provides a comprehensive overview of the subject directly contributing to the next generation space infrastructure from space tourism to space exploration This holistic treatment defines a mission portfolio addressing near term to long term space transportation needs covering sub orbital orbital and escape flight profiles In this context a vehicle configuration classification is introduced covering alternatives starting from the dawn of space access A best practice parametric sizing approach is introduced to correctly design the flight vehicle for the mission This technique balances required mission with the available vehicle solution space and is an essential capability sought after by technology forecasters and strategic planners alike Sarah Bowdich Lee (1791-1856) and Pioneering Perspectives on Natural History Mary Orr,2024-09-17 History from below uncovers overlooked protagonists contributing to inter national endeavour often against considerable odds Mrs T Edward Bowdich then Mrs R Lee 1791 1856 is indicative When women allegedly cannot

participate in early nineteenth century scientific exploration discovery and publication Sarah s multiple specialist contributions to French and British natural history have attracted no book length study This first appraisal of Sarah s unbroken production of discipline changing scientific work over three decades in modern ichthyology in historical geography of West Africa and in the next generational dissemination of expert scientific knowledge does more than fill this gap The book also pivotally investigates the intercultural interdisciplinary and multi genre reach of Sarah s pioneering perspectives and contributions and how she could achieve her work independently in her own name s over three decades Sarah s larger significance is then to provide a very different narrative for women at work in expert nineteenth century natural history making By everywhere challenging the secondary minor and domestic frames for women s contributions of the period the pioneering perspectives of Sarah s story also provide alternative paradigms to the leaky pipeline model still informing women s careers and work in STEM M today

**The Star Gate Archives** Edwin C. May, Sonali Bhatt Marwaha, 2019-04-24 Star Gate is the largest funded program in the history of psi research receiving about 19 933 million in funding from 1972 to 1995 Researchers from SRI International and later at Science Applications International Corporation in association with various U S intelligence agencies participated in this program Using the remote viewing method research focused on understanding the applicability and nature of psi in general but mostly upon informational psi Volume 1 Remote Viewing 1972 1984 and Volume 2 Remote Viewing 1985 1995 include all aspects of RV including laboratory trials and several operational results Volume 3 Psychokinesis focuses on laboratory investigations Volume 4 Operational Remote Viewing Government Memorandums and Reports includes an analysis of the applied remote viewing program and a selection of documents that provide a narrative on the behind the scenes activities of Star Gate In a total of 504 separate missions from 1972 to 1995 remote viewing produced actionable intelligence prompting 89 percent of the customers to return with additional missions The Star Gate data indicate that informational psi is a valid phenomenon These data have led to the development of a physics

and neuroscience based testable model for the underlying mechanism which considers informational psi as a normal albeit atypical phenomenon The Star Gate data found insufficient evidence to support the causal psi psychokinesis hypothesis

**Natural Catastrophe Risk Management and Modelling** Kirsten Mitchell-Wallace, Matthew Jones, John Hillier, Matthew Foote, 2017-04-24 This book covers both the practical and theoretical aspects of catastrophe modelling for insurance industry practitioners and public policymakers Written by authors with both academic and industry experience it also functions as an excellent graduate level text and overview of the field Ours is a time of unprecedented levels of risk from both natural and anthropogenic sources Fortunately it is also an era of relatively inexpensive technologies for use in assessing those risks The demand from both commercial and public interests including re insurers NGOs global disaster management agencies and local authorities for sophisticated catastrophe risk assessment tools has never been greater and contemporary catastrophe modelling satisfies that demand Combining the latest research with detailed coverage of state of the art catastrophe modelling techniques and technologies this book delivers the knowledge needed to use interpret and build catastrophe models and provides greater insight into catastrophe modelling s enormous potential and possible limitations The first book containing the detailed practical knowledge needed to support practitioners as effective catastrophe risk modellers and managers Includes hazard vulnerability and financial material to provide the only independent comprehensive overview of the subject accessible to students and practitioners alike Demonstrates the relevance of catastrophe models within a practical decision making framework and illustrates their many applications Includes contributions from many of the top names in the field globally from industry academia and government **Natural Catastrophe Risk Management and Modelling A Practitioner s Guide** is an important working resource for catastrophe modelling analysts and developers actuaries underwriters and those working in compliance or regulatory functions related to catastrophe risk It is also valuable for scientists and engineers seeking to gain greater insight into catastrophe risk management and its applications **SAEQ Issue 06** ,2015-03-28 Issue 06 Jan Feb Mar 2015 **Physical Mesomechanics And Spectrum Of Metal Surface Layer Excitation At Friction Process With Heavy Loading** A Kh Janahmadov N G Javadov The paper reviews the physical mesomechanics of structurally inhomogeneous media developed on the verge of continuum mechanics macro level and physics of plasticity and strength of deformable solids micro level According to the concept of the structural level of deformation at friction the surface layer of deformable solids is an independent leading functional subsystem It is shown that with an increase of the deformation level of material it develops autonomous processes plasticity waves inside which have a significant impact on the staginess of plasticity flow localization and the destruction of contacting bodies at the meso level the deformation has a transitional rotational character **Influence Of Wingtips On Induced Drag Force Of Rectangular Wing** R M Jafarzade M H Ilyasov J N Huseynli The paper examines the influence of wingtips on the inductive resistance of rectangular wing through the mathematical model based on the distribution of vortices Assuming that the free

vortices originate at the wingtips the imaginary shape vortex diagram is built above the wing at the height of wingtips The air is considered to be incompressible Referring to the Biot Savart formula the expression for the inductive velocity generated by the free vortices and their average values along the wingspan are found The induced drag force and its coefficient are determined through the average bevel angle of flow The inductive drag force is analytically proven Application Of Coordination Polymers To Increase The Reservoir Oil Recovery B T Usubaliev E E Ramazanova F T Murvatov E N Aliyev Y S Salakhova M K Munshieva F B Aliyev A K Rzaeva It is first time when an application of composite materials BAF 1 BAF 2 on the basis of the coordination polymers is studied to improve the rheological properties of crude oil It has been established that composite materials reduce the oil viscosity by 60-70% and also have a positive effect on other properties Relaxation Of The Non Equilibrium Field Effect In  $\text{In}_2\text{O}_3$   $\text{SiO}_2$  Structures At The Non Equilibrium Depletion Regimes A Z Badalov Sh G Zeynalova The article studies in detail the effect of various factors on the screening time of  $\text{In}_2\text{O}_3$   $\text{SiO}_2$  structures the influence of the lighting temperature and the supply voltage on the duration of the non equilibrium non stationary depletion process It also examines the dependence of the current depolarization on the power supply impulse duration with and without exposure to the LED light The Theoretical Analysis Of Crude Oil Vapour Pressure And Cavitation Technologies Studying Of Physical And Chemical Properties Of Transported Oil In The Course Of Cavitation S K Gezalov We have worked out the criterion of fuzzy interval for minimizing target function with fuzzy coefficient The given criterion shows adaptability of genetic algorithms for building pareto optimal solutions of multi objective problem of transport logistics with fuzzy coefficient of objectives

### **A History of Scientific Journals** Aileen Fyfe, Noah Moxham, Julie

McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03 Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton's optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history
