Differential Europe Adrienne Windhoff-Héritier, 2001 Heritier Kerwer Knill Lehmkuhl all with the Max Planck Project Group Common Goods Law Politics and Economics Teutsch European Union Department of the German Federal Ministry of Labour and Social Affairs and Douillet Ecole Normale Supérieure de Cachan combine efforts in this study to develop a theoretical and conceptual framework for studying the impact of European policies on member states The authors argue that the influence of EU policies on each member state depends on each state's preexisting policies and institutional capacity to change The study focuses on transport policy presenting case studies from Britain France Germany Italy and the Netherlands to demonstrate differences in the impacts of EU policies The text concludes with a comparison of the differences in responses of member states to identical European policy demands and similar external and internal conditions c Book News Inc

Energy Policy Making in the EU Jale Tosun, Sophie Biesenbender, Kai Schulze, 2015-01-05 The book adopts an innovative analytical approach to agenda setting by not only presenting successful cases in which energy issues were addressed by means of public policy but by also analyzing failed attempts to make issues part of the European

policy agenda Another outstanding feature of the book is its use of the latest empirical data on a broad range of energy issues When are energy issues likely to find their way to the agenda of European policymakers This is the key research question guiding this collection of empirical studies which will shed light on both successful and unsuccessful attempts to include energy issues in the European agenda The multi level political system of the European Union represents a particularly fruitful setting for addressing this question due to the multiple institutional access points it provides for different groups of actors The book has three key benefits First it provides a theory informed analysis of agenda setting processes in general and in the European Union in particular Second it presents an overview of the most important and emerging dimensions on European energy policy and third it helps to develop a research agenda for future research in the field *European Union* Jeremy Richardson, Sonia Mazey, 2015-02

Policy Making in the European Union - Policy Making and Implementation Heiko Bubholz, 2002-07-19 Seminar paper from the year 2002 in the subject Politics Topic European Union grade 1.0 Jagiellonian University in Krakow Centre for European Studies course EU Law and Institutions language English abstract Now in January 2002 a visible step in European integration has been accomplished With the introduction of the European currency about 296.8 million citizens of the European Union EU will hold the new symbols of unity of Europe's peoples in their hands What began with an attempt of reconciliation and co-operation via the ECSC in 1952 has now developed towards a so far unprecedented transfer of sovereign rights and competence from nation states to a supranational intergovernmental organisation However throughout the EU prevail doubts concerning the deeper mechanism of policy making Despite certain inscrutability and the mysterious nature of decision making there are demands for more democracy in the Union On the other side it may be assumed that most of the European citizens do not really take notice of high and low politics decided upon in the European institutions Aim of this paper shall therefore be a closer elaboration of the policy making process in the European Union the enforcement of decisions on European and national level and finally influences or interdependencies from outside the formal institution interfering in Europe's policy and polity Hence the results of the Nice IGC are not ratified yet which might not be assumed soon I focus on the binding regulations of the Amsterdam Treaty² After a short description of the as I would prefer to name it macro level Commission Council Parliament Courts where provisions are concluded the implementation of these policies and decisions on the micro national level shall be explained thereafter Finally outside impetus lobbying national interests etc on the decision and interpretation process shall be elaborated in a limited scope as well

Telecommunications Policy-making in the European Union Joseph W. Goodman, 2006-01-01 This book offers a good study of the development of telecommunications policy by the EU Great value to those interested in understanding both European telecommunications policy and more generally in how policy making operates in the EU Mark Thatcher West European Politics the book provides an interesting perspective on the evolution of nature of telecommunications policy making within the EU As a consequence the book should be of interest to telecommunications and politics government researchers alike Jason Whalley Communications Booknotes Quarterly This well written book deals with the emergence and shaping of telecommunications policy in Europe with a particular focus on the time period of 1987-1998 This book fills an important gap reviewing the initial formative years of European telecommunications policy development and liberalization in detail The book captures the complicated and interdependent policy formation process in Europe in a credible and thoughtful way without falling into the trap of admiring critical personalities and key actors The author has written an important and useful book which invites the research community to further explore the evolution of European

telecommunications policy Erik Bohlin Communications Strategies Examining the emergence of a European Union telecommunications policy Joseph Goodman explains how and why the policy developed as it did and why certain reforms in the sector were easier to achieve than others He provides a history of the key actors in the policy making process from the first attempts by the national postal telegraph and telecommunication administrations to coordinate their telecommunications policies in the 1950s to the implementation of a comprehensive EU telecommunications regulatory structure in 1998 and the development of a new regulatory structure in 2003 The analytical framework employed by the author draws upon new institutionalism and actor based approaches providing an opportunity to evaluate the utility of a synthetic approach for examining and explaining EU policy making The focus of his analysis is on the European Commission s two pronged strategy of liberalisation and harmonisation which began in the late 1980s and culminated in an important milestone on January 1st 1998 when the EU Member States fully opened their telecommunications markets to competition He concludes that a synthetic approach which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis is useful even necessary in understanding and explaining the many dimensions of EU policy making This authoritative study will be of interest to all those in the telecommunications industry including attorneys consultants and lobbyists who would like to know how the EU s policy developed It will appeal more generally to political scientists and scholars of European history and politics
