Educational Innovation in Economics and Business III Richard G. Milter, John E. Stinson, Wim H.

Gijsselaers, 2013-03-09 Almost thirty years ago a friend involved in the education profession told me that in his estimation much more was caught by students outside of classrooms than was taught within those hallowed walls This statement has stuck with me through years of personal schooling working as a high school teacher working in management serving as a management consultant and trainer and facilitating learning on university campuses across the US eastern Europe and Asia Learning by doing is certainly something most people have experienced But the fact that there is more opportunity to learn more things today as never before with knowledge doubling every 20 months makes learning by doing more complicated As organizations move to respond to the rapid changes in their environments people within those organizations must face the uncertainty and ambiguity that comes with such conditions The one thing most futurists agree on is that the future will be very different than the present Exponential change has become commonplace Companies used to worry about redefining their goals and specific describing their place in an industry Today in order to survive they must be constantly addressing the issues inherent in redefining their industries

Novel Concepts, Systems and Technology for Sludge Management in Emergency and Slum Settings Peter Mawioo,2020-02-07 Management of sludge is one of the most pressing issues in sanitation provision The situation is especially complex when large quantities of fresh sludge containing various contaminants are generated in onsite sanitation systems in urban slums emergency settlements and wastewater treatment facilities that require proper disposal of the sludge The application of fast and efficient sludge management methods is important under these conditions This study focused on the development of an innovative sludge treatment unit that is based on the microwave irradiation technology The technology provides a rapid and efficient option for sludge treatment in isolated conditions such as slum emergency and similar situations The microwave based technology forms part of the eSOS emergency sanitation operation system concept that promotes an integrated sanitation approach in which all components of the entire sanitation chain are planned holistically Besides the study addresses the deficiencies associated with the poor choice of emergency sanitation technology options by proposing a methodology that is based on compensatory multi criteria analysis This study contributes in providing solutions towards improved sanitation in complex scenarios especially the management of faecal sludge in emergency and slum conditions

Terminology, Ontology and their Implementations Peter L. Elkin,2022-11-10 This set of teaching notes provides extensive guidance for educators related to its sister title and contains numerous tools and questions to help educators provide didactics and evaluation of students in this essential area of biomedical informatics This is needed to understand the central topics of ontology terminology and terminological systems in healthcare Twenty five years ago the notion that ontology would be essential to knowledge representation in healthcare was all but unknown Almost all important terminologies and many ontologies are now in wide use and are growing in importance With no general model of what a ontology and terminology should be there are an

increasing number of tools to support ontology terminology development implementation and maintenance Steady progress since then has improved both ontology terminology content and the technology and processes used to sustain that content Terminology Ontology and their Implementations Teaching Guide and Notes provides extensive teaching materials to accompany Terminology Ontology and their Implementations It provides further definition of the topic and explains the use of reference terminologies needed to use them safely It contains questions and explanations from each section of the textbook making it easier to use the text in teaching Health Informatics students The authors also provide supplementary information about the questions their relevance and their relation to other concepts This book augments Terminology Ontology and their Implementations by assisting the understanding of terminology services and the architecture for terminological servers and consequently serves as an essential tool for educators in their efforts to teach students in their study of health informatics

Rethinking Faecal Sludge Management in Emergency Settings Fiona Zakaria, 2019-07-24 The development of technology in the emergency sanitation sector has not been emphasised sufficiently considering that the management of human excreta is a basic requirement for every person The lack of technology tailored to emergency situations complicates efforts to cater for sanitation needs in challenging humanitarian crisis Concerns persists on the lack of faecal sludge management that considers the whole sanitation chain from containment until treatment This study focused on the development of a smart emergency toilet termed the eSOS emergency sanitation operation system smart toilet to address the limitation in technical options This toilet is based on the eSOS concept that takes into account the entire sanitation chain This study also addresses the limited time for planning in emergencies by developing a decision support system DSS to help quick selection of optimal sanitation options The aim was to enable users of the DSS to plan their emergency sanitation response within the shortest time possible The study aims to contribute toward a better emergency sanitation response by application of technology advances 2025-26 TGT/PGT/GIC Geography Solved Papers.
