The Sustainable World C. A. Brebbia, 2011 This book contains a collection of papers presented at a series of meetings organised by the Wessex Institute of Technology WIT dealing with sustainability the environment and ecological issues The complexity of the modern world presents new challenges to scientists and engineers that requires finding interdisciplinary solutions Any problem solving carried out in the isolation of a particular field of expertise may give rise to a series of damaging effects which can create new and unintentional environmental and ecological problems Specialisation while required in our culture needs to be kept under control by the understanding of the whole which leads to the need of relying on interdisciplinary teams Nowadays this can be easily achieved thanks to the massive advances in information technology which ensure continuous and immediate contact between all partners This collaboration needs to be effective and to produce results that will lead to a better world For this to happen it is necessary that different groups of scientists and engineers acquire the necessary skills to be able to talk to each other Furthermore they need to understand the social and economic aspects of a given problem in addition to the scientific and engineering issues involved The Wessex Institute of Technology WIT has a long and very successful record in organising interdisciplinary conferences The papers in this book are a reflection of the
