THE HIGHER LOAD MOMENT INDICATOR AND AUTO-TWO-BLINDER SYSTEM improves operator control operational factors of the crane and enhances their work when they together while providing the operator with a continuous visual display of crane load. Directly measuring the weight and moment of crane load with load cells, an integral load and moment warning system alerts the operator if an overload or two-level condition exists. After the Grove automatic de-power circuit, during the lift flow, these functions allow operator to go on with a two-level operation, providing operation of only those crane functions that will improve the situation.
