Parker now assigned to the Asian Criminal Enterprise Task Force in the FBI's New York Field Office has no time to spare for a year old case he sees as a dead end especially since it would mean working with a woman he never expected to see again. He's pursuing the leader of a Chinese gang and trying to solve a series of grisly murders in Chinatown so he initially offers Sloane the case files and minimal cooperation. But as more women disappear and others turn up brutally murdered, Derek's priorities shift and he and Sloane come to the sickening realization that these random crimes are linked to the same crazed killer. Measuring the User Experience Bill Albert, Tom Tullis, 2010-07-27 Measuring the User Experience provides the first single source of practical information to enable usability professionals and product developers to effectively measure the usability of any product by choosing the right metric, applying it and effectively using the information it reveals. Authors Tullis and Albert organize dozens of metrics into six categories: performance issues, based self-reported, web navigation, derived and behavioral, physiological. They explore each metric considering best methods for collecting, analyzing and presenting the data. They provide step by step guidance for measuring the usability of any type of product using any type of technology. This book is recommended for usability professionals, developers, programmers, information architects, interaction designers, market researchers and students in an HCI or HFE program. Presents criteria for selecting the most appropriate metric for every case. Takes a product and technology neutral approach. Presents in depth case studies to show how organizations have successfully used the metrics and the information they revealed.
