Sentimental Analysis and Deep Learning Subarna Shakya, Valentina Emilia Balas, Sinchai Kamolphiwong, Ke-Lin Du, 2021-10-25. This book gathers selected papers presented at the International Conference on Sentimental Analysis and Deep Learning ICSADL 2021 jointly organized by Tribhuvan University Nepal, Prince of Songkla University Thailand and Ejesra during June 18-19, 2021. The volume discusses state-of-the-art research works on incorporating artificial intelligence models like deep learning techniques for intelligent sentiment analysis applications. Emotions and sentiments are emerging as the most important human factors to understand the prominent user-generated semantics and perceptions from the humongous volume of user-generated data. In this scenario, sentiment analysis emerges as a significant breakthrough technology which can automatically analyze the human emotions in the data-driven applications. Sentiment analysis gains the ability to sense the existing voluminous unstructured data and delivers a real-time analysis to efficiently automate the business processes. Meanwhile, deep learning emerges as the revolutionary paradigm with its extensive data-driven representation learning architectures. This book discusses all theoretical aspects of sentimental analysis, deep learning and related topics.

The War on Learning Elizabeth Losh, 2014-04-25. An examination of technology-based education initiatives from MOOCs to virtual worlds that argues against treating education as a product rather than a process. Behind the lectern stands the professor deploying course management systems, online quizzes, wireless

clickers PowerPoint slides podcasts and plagiarism detection software In the seats are the students armed with smartphones laptops tablets music players and social networking Although these two forces seem poised to do battle with each other they are really both taking part in a war on learning itself In this book Elizabeth Losh examines current efforts to reform higher education by applying technological solutions to problems in teaching and learning She finds that many of these initiatives fail because they treat education as a product rather than a process Highly touted schemes video games for the classroom for example or the distribution of iPads let students down because they promote consumption rather than intellectual development Losh analyzes recent trends in postsecondary education and the rhetoric around them often drawing on first person accounts In an effort to identify educational technologies that might actually work she looks at strategies including MOOCs massive open online courses the gamification of subject matter remix pedagogy video lectures from Randy Pausch to the Baked Professor and educational virtual worlds Finally Losh outlines six basic principles of digital learning and describes several successful university based initiatives Her book will be essential reading for campus decision makers and for anyone who cares about education and technology
