Worley,2013-12-18 It is refreshing to see a book such as this which is both broad in its conceptualization of the field of child research and deep in its focus The volume s editors are paragons of awareness when it comes to the need for interdisciplinary research and theory to illuminate the lives and experience of children James Garbarino Loyola University Chicago Covers a satisfying and unprecedentedly wide range of research relating to childhood The contributors include many eminent international scholars of childhood making the book a valuable resource for child researchers Child advocates will also find the book to be invaluable in their efforts to improve children s well being and to change policies and practices for the better Anne Smith University of Otago A really scintillating collection that will provide a lasting perspective on child studies stimulating and comprehensive Jonathan Bradshaw University of York In keeping with global changes in children s social and legal status this Handbook includes examination of children as family members friends learners consumers people of faith and participants in law and politics The contributors also discuss the methodological and ethical requirements for research that occurs in natural settings and that enables children themselves to describe their perspective The book is divided into three parts Part I Setting Specific Issues in Child Research Part II Population Specific Issues in Child Research Part III Methods in Research on Children and Childhood **Title Announcement Bulletin** ,1956 **Keywords Index to U.S. Government Technical Reports (permuted Title Index).** United States. Department of Commerce. Office of Technical Services,1963 The Examiner ,1854 *Breaking Point* Rebecca Schwartz Greene,2023-01-03 WINNER SOCIETY FOR MILITARY HISTORY DISTINGUISHED BOOK AWARDS FIRST BOOK This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II Breaking Point is the first in depth history of American psychiatry in World War II Drawn from unpublished primary documents oral histories and the author s personal interviews and correspondence over years with key psychiatric and

military policymakers it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre and post induction examinations. Ultimately 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds. Never before or since has the United States engaged in such a program. In designing Selective Service Medical Circular No. 1, psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter. While many American and European psychiatrists questioned this belief and huge numbers of American psychiatric casualties soon raised questions about screening's validity, psychiatric and military leaders persisted. In 1942 and 1943, in endorsing ever tougher screening and little else, soon families complained of fathers and teens being drafted instead of being identified as psychiatric. 4Fs and Blacks and Native Americans among others complained of bias. A frustrated General George S. Patton famously slapped two malingering neuropsychiatric patients in Sicily, a sentiment shared by Marshall and Eisenhower though they favored a tamer style. Yet psychiatric rejections, evacuations and discharges mounted. While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943, this was the exception. But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself, not predisposition, precipitated breakdown, leading military psychiatrists switched their emphasis from screening to prevention and treatment. But this switch was too little, too late and slowed by a year-long series of Inspector General investigations, even while numbers of psychiatric casualties soared. Ironically, despite and even partly because of psychiatrists' wartime performance plus the emotional toll of war, postwar America soon witnessed a dramatic growth in numbers, popularity and influence of the profession, culminating in the National Mental Health Act, 1946. But veterans with PTSD not recognized until 1980 were largely neglected.

Bibliography of Scientific and Industrial Reports, 1968 **Cities and Their Vital Systems** Advisory Committee on Technology and Society, 1989. *Cities and Their Vital Systems* asks basic questions about the longevity, utility and nature of urban infrastructures, analyzes how they grow, interact and change and asks how, when and at what cost they should be replaced. Among the topics discussed are problems arising from increasing air travel and airport congestion, the adequacy of water supplies and waste treatment, the impact of new technologies on construction, urban real estate values and the field of telematics, the combination of computers and telecommunications that makes money machines and national newspapers possible.
