Political Metaphor Analysis Andreas Musolff, 2016-08-25 Political metaphors and related figurative discourse tools are characterised by their variability and contentiousness Using them discourse participants try to gain competitive advantage over others by offering their audiences new meaning nuances challenging each other and announcing political initiatives It is here that metaphor as a means to change meanings and thus to change social and political reality comes into its own Political Metaphor Analysis provides an innovative approach to the study of figurative language use in political discourse by presenting empirical analyses based on a large corpus of political metaphors and metonymies linking these analyses to theoretical positions and assessing their limitations and perspectives for further exploration The classic model of conceptual metaphor analysis pioneered by Lakoff and Johnson 1980 and expanded and amended over the past thirty five years is critically examined with regard to new findings about the variation historicity pragmatic exploitation comprehension and interpretation of metaphors As a central new analytical category the notion of metaphor scenario is proposed and tested against various sub sets of data It allows to link hypothesised conceptual metaphors to narrative argumentative and evaluative patterns in actual discourse and understanding processes so that their cognitive significance can be more reliably gauged and theoretically modelled

Politeness in East Asia Dániel Z. Kádár, Sara Mills, 2011-09-08 We use politeness every day when interacting with other people Yet politeness is an impressively complex linguistic process and studying it can tell us a lot about the social and cultural values of social groups or even a whole society helping us to understand how humans encode states of mind in their words The traditional stereotypical view is that people in East Asian cultures are indirect deferential and extremely polite sometimes more polite than seems necessary This revealing book takes a fresh look at the phenomenon showing that the situation is far more complex than these stereotypes

would suggest Taking examples from Japanese Korean Chinese Vietnamese and Singaporean Chinese it shows how politeness differs across countries but also across social groups and subgroups This book is essential reading for those interested in intercultural communication linguistics and East Asian languages Toward a Motivation Model of Pragmatics Rong Chen, 2022-07-18 With the discursive turn has come a distrust a complete rejection by some of theories that seek deeper reasons for surface phenomena Rong Chen argues that this distrust with its accompanying overemphasis on specificity and fluidity of linguistic meaning and social values is unwarranted and unhelpful Drawing on insights from social theories and various strands of pragmatics he proposes a motivation model of pragmatics MMP contending that language use can be adequately coherently and elegantly studied via the motivation behind it in its varied and dynamic contexts The model with its well laid out components is then applied to im politeness research cross cultural pragmatics diachronic pragmatics discourse and genre analysis conversation analysis identity construction and the study of metaphor sarcasm parody and lying MMP is thus a framework aimed at accounting for fluidity with stable notions specificity with general principles and differences with similar underlying factors As such the book should appeal to students of pragmatics im politeness conversation analysis sociolinguistics applied linguistics communication sociology and psychology Expressions, Speech Acts and Discourse Willis J.
