Explaining Religious Party Strength Mário Rebelo,2022-12-30 Explaining Religious Party Strength explores why

religious political parties are electorally successful in some countries but not in others Drawing on insights from political science and sociology this book argues that religious parties are typically formed for defensive reasons reacting against state builders attempts to secularize public services such as education welfare and healthcare Building on these findings the author argues that the strength of religious parties is determined by the infrastructural power of the state Weak states that fail to provide adequate public services open up space for religious communities to build a dense network of private schools hospitals and charities which translates into votes for religious political parties By contrast strong states that provide efficient public services squeeze out private welfare providers undermining the electoral strength of religious political parties The author tests this theory through statistical analysis using a new dataset on all religious parties which have participated in national parliamentary elections between 1800 and 2015 He includes comparative historical analyses of Roman Catholic political parties in France and Italy and Sunni Islamic political parties in Egypt Turkey and Albania This book will interest students and scholars of religion and politics specifically those interested in party formation voting and political activism as well as policymakers

Violent Non-State Actors Zdenek Ludvík, 2023-05-15 Violent Non State Actors The Politics of Territorial Governance is an original in depth scholarly explanation of the impact of territorial penetration control and governance on the effectiveness of the activities of violent non state actors VNSA The theoretical framework operates with the assertion that a non linear causal relationship mediated through the capacity for territorial control and governance exists between the effectiveness of objective achievement and territorial penetration Using four case studies Zdenek Ludv k links these interrelated concepts of territorial penetration territorial control and territorial governance into an interrelated sequentially conceptualized causal framework To this end extensive and unique empirical material gathered to examine the activities of VNSA in considerable detail presents a wholly original and comprehensive method of measuring the degree of territorial capability of VNSA Zdenek Ludv k demonstrates

that there is no directly proportional relationship between territorial penetration and objective effectiveness since neither territorial penetration nor territorial control alone are sufficient to achieve increased effectiveness He shows that territorial penetration and territorial governance are necessary conditions for objective effectiveness since only when territorial penetration and territorial control are followed by territorial governance at the level of advanced wartime social order can VNSA hope to achieve a higher degree of effectiveness

When Ideas Matter Bilal A. Baloch, 2021-10-07 Comparativist scholarship conventionally gives unbridled primacy to external material interests chiefly votes and rents as proximately shaping political behaviour These logics tend to explicate elite decision making around elections and pork barrel politics but fall short in explaining political conduct during credibility crises such as democratic governments facing anti corruption movements In these instances Baloch shows elite ideas for example concepts of the nation or technical diagnoses of socioeconomic development dominate policymaking Scholars leverage these arguments in the fields of international relations American politics and the political economy of development But an account of ideas activating or constraining executive action in developing democracies where material pressures are high is found wanting Resting on fresh archival research and over 120 original elite interviews *When Ideas Matter* traces where ideas come from how they are chosen and when they are most salient for explaining political behaviour in India and similar contexts
